Visual Reporting Platform for MATs

Shared Visions, Shared Solutions.
Active Dashboards: The Science of Success

Single Version of the Truth

The vast number of differing systems and data locations within a multi-academy trust can make it difficult (if not impossible) to obtain a single version of information you can use to confidently measure performance and make decisions.

Without a consistent frame of reference, you can't effectively analyse and compare your results for individual academies, sites, departments, courses, staff members, students, across years or against your peer trusts.

Reliable and in Real-Time

Active Dashboards is an agile, interactive reporting tool which connects disparate data from across whole trusts and academies. This helps you to analyse essential metrics using easy-to-read dashboards.

Providing reliable, real-time measures of performance across a trust, the platform enables you to demonstrate improvements and development in order to secure crucial funding.

"**When you're talking about dashboards in education, you're talking about Dynistics. The two just go together.**"

Paul Reid, Head of Information and Planning, Capital City College Group

DYNISTICS
Education

To monitor and improve performance effectively, you need the right reporting tools in place.

Having instant access to real-time information allows you to work pro-actively. Issues can be flagged with enough time to act and make a difference. With no nasty surprises at the end of term, leadership can make more well informed decisions, faster.

Dynistics is dedicated to helping schools, academies, colleges and universities across the UK use data to their best possible advantage, empowering students and learning institutions achieve excellence.

Excellence in Education

ACADEMY REPORTING

Active Dashboards student data analysis software provides schools and academies with accurate real-time monitoring and reporting of key performance indicators.

INSPECTION BODY REPORTING

Increases the availability of timely, accurate information for Ofsted, Estyn and Education Scotland inspectors.

BENCHMARKING

Uses national statistics to produce benchmarks and academy comparisons.

STUDENT PROGRESS

Provides in-year progress insights at trust, academy, subject and student levels.

INTERVENSION OUTCOMES

Helps staff assess the effectiveness of intervention strategies and identify where change is needed.

DEMOGRAPHIC PERFORMANCE

Povides new insights into performance by gender, FSM, Pupil Premium, EAL and ethnicity.

SUBJECT LEVEL VALUE

Highlights trends on one and three year subject level added value.

COURSE VIABILITY

Gives leadership reliable information on sixth form course viability in order to make fast, accurate assessments.

PREDICTIONS AND ACHIEVEMENT

Enables leadership to set targets, create predictions, calculate average point scores and compare against actual achievement.

GOVERNANCE

Designed to provide Governors with the necessary overview required to ensure regular scrutiny of performance.

BUDGET

Enables academies to calculate pupil income per period and teaching costs per minute.

OBSERVATIONS

Reports on lesson observations to effectively measure and monitor staff performance to help improve the quality of teaching.

FINANCE

Maximising income whilst continuing to maintain quality. Compare costs and outcomes across Multi Academy Trusts.

> "Data traditionally refers to what's happened but what we really want is to know what's happening now – and what's going to happen. These dashboards help us to be more immediately responsive, because we don't have to wait four weeks for a KPI report, by which point it's too late to change anything."
>
> **Greg Barker, Assistant Principal, Queen Elizabeth Sixth Form College**

DYNISTICS
Education

What does this mean for your MAT?

For the majority of existing Active Dashboards education users, the benefits they gained can split into two categories: financial and time. The most common areas in which MATs can generate a rapid financial return on their investment are:

£9K - £12K
£21K - £25K
£4K - £6K
£30K - £40K
£15K - £23K
£2K - £12K

■ Maximum Typical Savings

■ Minimum Typical Savings

Reduced Management Time Spent in Meetings
Based upon a Senior Management Team of eight people, savings are an 18% reduction in meeting times.

Reduced Effort on Generating Reports
Based upon reduction of one full time member of staff.

Simplified Communication with Governors
Reduces collation, printing and distribution of Governor information.

Improves Staff Utilisation
Generates a minimum 10 minute monthly saving for all staff by presenting data in a central place.

Improved Budgeting
By providing budget holder with direct access to their financial position, 14% reduction in time spent resolving budgeting issues.

Reduced Cost Of Software Renewals
Eliminates the cost of software rendered redundant through the implementation of dashboards.
