

i-spi
eon

...security that pays

features

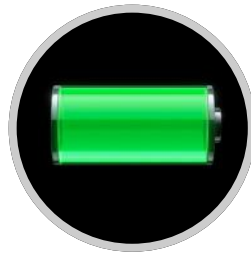

Vehicle tracking devices are used by individuals and companies all over the world. FSL have developed the *i-spi eon* tracking device with a number of unique and innovative features that take tracking devices to new levels for vehicle security and safety.

Quick Installation

Simply attach the *i-spi eon* tracking device to any vehicle or plant machinery using its powerful built-in magnet. With no cabling or wiring, the device can be covertly placed.

Long-life battery

i-spi eon has a high capacity internal battery, allowing extended monitoring without external power for up to 100 days. A shock sensor inside saves power when your vehicle is stationary. Recharging is simple. We include a USB charging cable with every device.

Easy to use

Once installed, simply text the device from your mobile phone to receive co-ordinates of its location. If you're using a smart phone, you can view the location of your device on the maps app.

Live tracking

Enjoy total visibility of vehicles and assets with *i-spi eon* real-time tracking feature via web based software. Live information on location, speed and mileage are captured via the device onboard and sent back in real-time. The live tracking feature is available as a low cost monthly rolling plan.

Multiple users

i-spi eon offers a multiple user capability that allows more than one vehicle or asset to be tracked at any given time via the web based software. Beneficial for businesses with a fleet of vehicles on the road.

Accurate tracking

Particularly suited to Trailers, Hire vehicles, Rental Equipment, Farming Machinery, Company vehicle monitoring, Family vehicle monitoring and other tracking and security applications
