

D150 Fire Resisting Roller Shutter

The industry's best at a competitive price

The Mechdoors D150 Fire Resisting Roller Shutter is ideal for industrial and commercial use for fire containment at vehicle openings, pedestrian openings and hatches with up to 2hrs fire rating.

Our D150 Fire Resisting Roller Shutter is designed and manufactured by leading trade suppliers to meet the most stringent requirements for a security product with fire resistance, using the industry's best components, all at a competitive price.

Better design and better made

All components including the lath curtain, bottom bar, side guides and barrel assembly are designed for ease of installation, maintenance and repair.

Release mechanisms include fire relay, solenoid, key switch and fusible link. Options include an Audio Visual Warning (FDI) panel and battery backup if mains power cannot be maintained.

Polyester powder coated colour finishes increase aesthetics and provide customisation.

Safety as standard

Electric operation (single phase tubular motor) is most common for light use applications via a key switch.

Electric operation (3 phase geared motor with controlled descent) is most common for heavier use applications via a low voltage 3 button station (open/close/stop).

Safety brakes and double spring barrel assemblies (for manually operated shutters) are included where applicable to meet the single component failure safeguard requirements of BS EN 12604:2000.

Technical Sales & Support

Every enquiry is handled by our dedicated technical sales team who are focussed on providing the best and most cost effective solutions quickly and efficiently.

For every order we appoint a job manager who arranges all material, engineer and Health & Safety resources and scheduling required to carry out the work on time and on budget. Our in house team handle all calls and emails to ensure the smooth running of every job from first contact to completion.

A site meeting with the appointed job manager is held to review the work, confirm site details, to determine site restrictions and hazards, and plan dates for the work.

Our family of long serving and motivated site engineers provide a reliable service delivery of confidence and attention to detail.

Our in-house fabrication facility is also capable of handling all Industrial Door and Roller Shutter repairs and upgrades from any manufacturer.
