# chic & contemporary window blind automation for the modern home

## modern technology sleek motorisation

You can now filter daylight and increase privacy more easily with One Touch motorised blinds - helping us to think differently about how we control light and shade in our home.

One touch motorised window blinds can be raised or lowered at the touch of a button using a unique wand for single blinds, or a simple to use remote control for single or multiple blinds.

One Touch is available for every room and is a cool and stylish addition to the home. Whether it's for windows that are difficult to reach, a child safe solution for children's bedrooms or just for the convenience that automation offers in sitting rooms, the One Touch is for you.

One touch brings you motorisation at surprisingly low prices since the battery powered options require no wiring, making installation quick, clean and simple. Mains powered blinds are also available and ideal for new blinds and renovation projects.

## eliminate the need for operating chains and cords with one touch motorised window blinds

We all know that growing children equals increased curiosity, which is why we make child safety a top priority.

A One Touch motorised blind is entirely child safe: With the 300 & 700 Series battery operated options, the Magic Wand is attached to the blind cassette and hangs discreetly at the edge of the blind.

Alternatively, with the 1100 Series the operating remote control can either be stored safely within a holder attached to a wall or used as a mobile device and stylishly displayed anywhere in the room.

Both options mean that operating chains and cords are not required, making the perfect addition to your home and giving you complete peace of mind.
