

Pilot treatment solution in Soquel Creek Water District, Northern California

INDUSTRY

Water utilities industry

LOCATION

California USA

PROJECT

Cost effective water treatment solution for Soquel Creek Water District

Soquel Creek Water District was an early leader in the drive to comply with California's newly tightened MCL for chromium-6. They called on Ionex SG for expertise and technology that would help them deploy the most efficient and cost effective treatment solution for their community. Over several months, we installed the system in a pilot configuration.

The images below show how the partnership unfolded.
