

## Machine builds

The full range of Lewis & Raby's engineering services and mechanical engineering expertise come together for our custom machine builds.

We can manage every aspect of your machine project from initial design to the final paintwork, delivery and on-site installation.

We manufacture a range of bespoke parts for machines and handle all aspects of machine manufacture including welding, fabrication and precision CNC machining.

Our fully qualified and skilled craftsmen use our comprehensive testing and inspection facilities to ensure that each machine is built to the highest standards.

Machines built by Lewis & Raby have been used in a range of industries including agriculture, food, printing, and the oil and gas sector.

Contact our experienced engineering team on 0151 546 2882 or email [enquiries@lewisandraby.co.uk](mailto:enquiries@lewisandraby.co.uk) to discuss manufacture of your machine build.
