

“Dash Alert

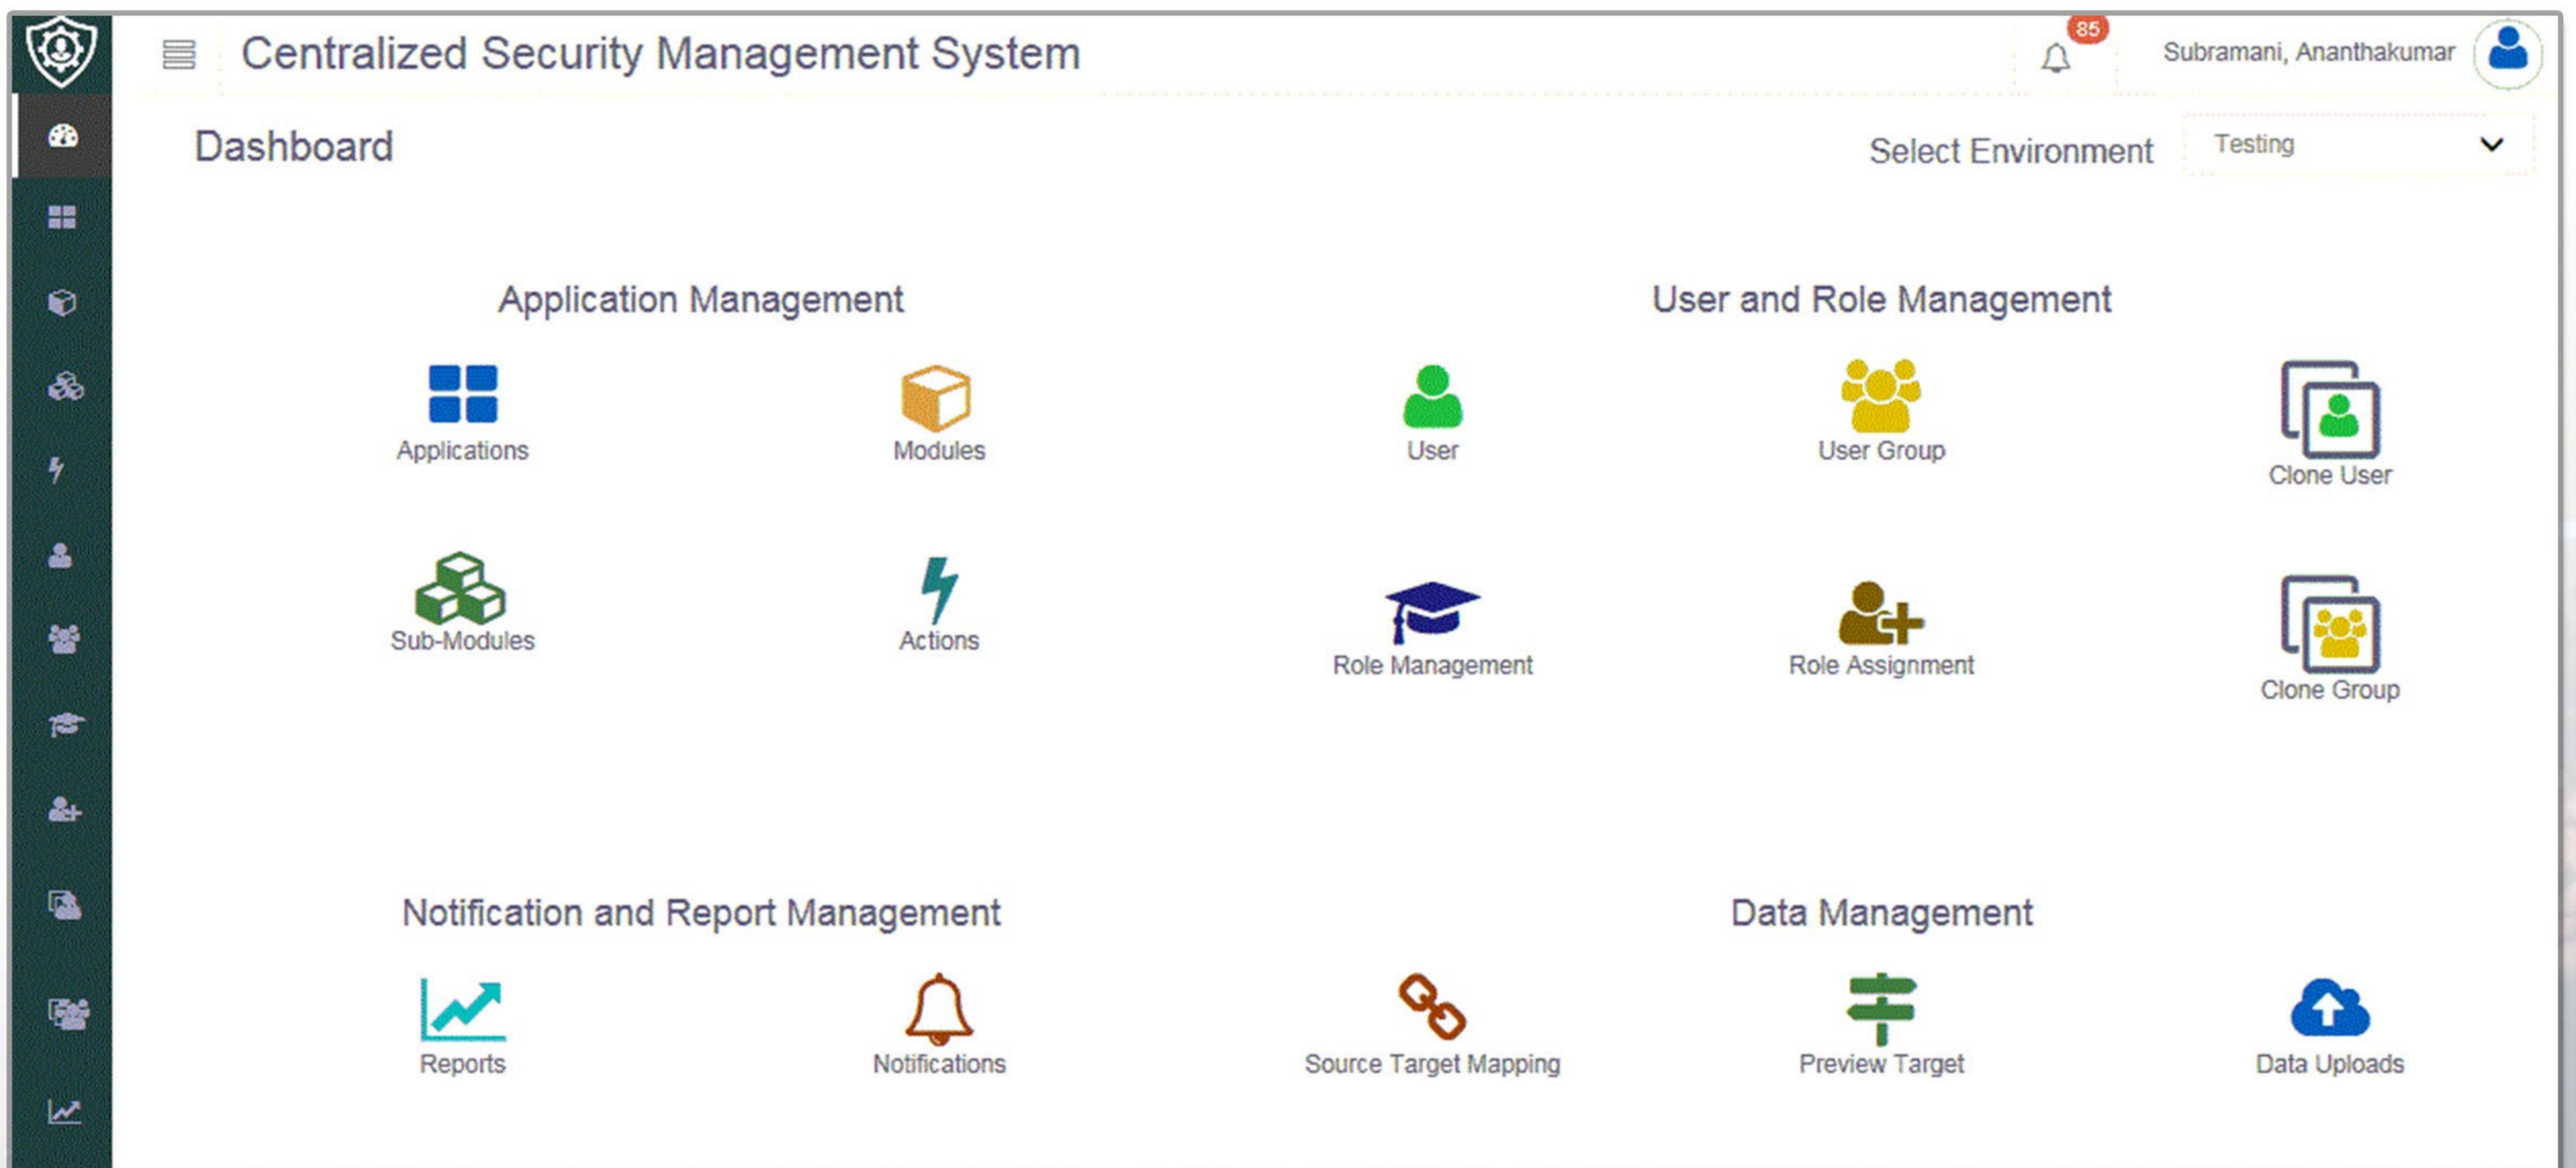

Centralized security management system

Upgrade Your RACF To Get Real-time Alerts

Legacy enterprise-wide systems, using RACF or similar security products that provide permissions and access control, provide alerts that are many times sent hours after a breach has occurred. With Ventech Solutions Dash Alert™, administrators are notified immediately when a breach occurs.

Control Privileges and Access

Dash Alert allows you to provide various levels of access and permissions to enterprise-wide application modules, submodules, and cross approval actions and receive immediate notifications of security breaches, allowing you can take quick action to secure your enterprise systems.

Contact us today to learn how Ventech Solutions Dash Alert can provide you with the highest level of security for your enterprise systems.

Ventech Solutions is a healthcare solutions provider who has expertise in end-to-end information technology life cycles and data solutions.
