NOTES ON SUBJECT CHOICES

- Food Science and Nutrition is a level 3 Diploma, all other subjects listed are full A Level courses, unless otherwise indicated.
- Choices should be made by **Friday 20 December**; thereafter choices will be met on a first come, first served basis. Late changes to choices will be dependent upon plans already in place for September's teaching sets.
- Pupils should choose three or four subjects, but never more than one subject from each of the blocks above. Universities usually require three A Levels, or their equivalent.
- We expect to run courses only if sufficient demand exists, and will not usually allow a course to begin unless four or more pupils have chosen it.
- Pupils choosing Further Mathematics study Mathematics and Further Mathematics, counting as two subjects. Pupils may choose Further Mathematics only with the full support of the Head of Mathematics.
- Pupils (and especially those who do not have English as a first language) must be aware that certain courses place a high demand on literacy skills
