

PRODUCT CATALOG

For Over Twenty Years...

Bonart Co. LTD has been manufacturing precise, quality dental instruments and devices at some of the most competitive prices on the market. With our commitment to top-notch customer service and dependability, Bonart products are the #1 choice for dental and veterinary professionals who demand state-of-the-art equipment at down-to-Earth prices.

BONART

ART M3II

Our premier magnetostrictive scaler, the ART-M3II is a compact, powerful and - thanks to a built-in LCD screen- easy-to-use 3-in-1 scaling device which will serve as your clinic's most reliable Swiss army knife. With a foolproof mode indicator for perio, endo and scaling, the ART-M3II always knows just how much power you need.

BONART

ART M1

The no-frills alternative to the popular M3II, the ART-M1 has all of the same power and versatility, with a price point geared for the budget-minded. Scaling, perio and endo are all handled with equal precision, making the ART-M1 a great choice for small and large clinics alike.

BONART

The image shows a beige rectangular dental scaler unit with a digital LCD screen on the front displaying '02'. To the left of the screen are three buttons labeled 'P', 'S', and 'E'. To the right are two large black knobs labeled 'POWER' and 'WATER'. A grey handpiece with a purple band and a metal tip is connected to the unit. The background features a splash of water. The text 'ART P3II' is overlaid on the image, with 'ART' in blue and 'P3II' in yellow.

ART P3II

Combining all of the benefits of traditional piezo scalers with the quality and portability that you've come to expect from Bonart, the ART-P3II is the perfect addition to the modern dental clinic. With an LCD screen for flawless readout, three specific and unique operational modes (scaling, endo and perio) and a metal torque wrench for fast tip installation, the ART-P3II will place you and your practice ahead of the wave.

BONART

ART P6

You asked for it and we've done it: created a full-power piezo scaler at nearly half the size. The ART-P6 removes the LCD but retains all of the functionality and precision of its forebearer, and - with a sleek redesign and LED power dial - does it with style.

INSERTS & TIPS

Need magneto inserts or piezo tips for your Bonart machine, or just looking for replacements for scalers of any brand? Bonart's got you covered, with durable, well-crafted inserts and piezo tips that meet the most rigorous standards of quality and compatibility. From internal to external water, scaling slim to perio fine, Bonart has what you're looking for at a fraction of competitor's prices.

BONART **ART** 

ART L5

At a whopping 5 watts, the ART-L5 is a powerful, fast-acting curing light to meet the demands of modern composites. With a standard 5 second curing time*, cordless hand piece and three unique curing modes, the ART-L5 brings precision and style to the world of LED curing lights.

*at 2mm depth

*Rated CR Choice #2 by
Gordon Christensen!*

~Clinician's Report Vol 3 # 10, October 2010

BONART

ART L3 (& L3 PRO)

(Pro model features a fiber-optic light guide.)

All of the reliability of the ART-L5 in a portable, 3 watt package! Incredibly light weight, easily maneuverable and featuring a 9 second standard curing time*... the ART-L3 is a curing mini marvel.

*at 2mm depth

BONART

ART PB3

For those who desire all of the quality and performance of Bonart's stand-alone models in a smaller, built-in package, now you can add the intuitive functionality and ease of use from our larger scalers into your pre-existing chairs and dental rigs, with minimal installation and zero hassle. Choose between our piezo-style PB3 or the magneto MB3.

ART MB3

BONART

ART E1

A favorite of oral surgeons and veterinarians alike, the ART-E1 is the perfect complement to any practice looking for a compact electrosurgery device. Unlike electrocautery systems, the ART-E1 utilizes monopolar radio waves - not heat - to provide precise control for minor incisions, excisions and drainings.

With ten modes for detail-specific procedures as well as an accident-preventative grounding plate, the ART-E1 removes the guesswork and lets you focus on what's really important: the well-being of your patients.

BONART

ART OP1

The oral surgeon's choice par excellence, the OP1 is an intuitive piezo device for your more delicate surgical tasks. Featuring a micro-processor-controlled hand piece for instantaneous frequency adjustment and a no-trip cordless foot switch, the ART-OP1 has been designed for worry-free bone and periodontal surgery, and is the perfect fit for sinus lifts as well as orthodontic and endodontic surgery.

BONART 

IM1 stands for "Implant Motor 1", and the ART-IM1 is certainly first in its class. Precision-crafted for implant surgery as well as implant site preparation, the ART-IM1 comes equipped with ten preset implant options and features a wide-range (600-40,000 RPM) torque-controlled micro-motor and a hands-free three stage foot switch. Combine this with the power and versatility of the ART-OP1 and you have a sleek, efficient and clutterless operatory.

ART IM1

BONART

ART SP-1

Two veterinary staples in one, the ART-SP1 fuses our trusted magneto scaling system with a powerful 35,000 RPM polishing hand piece. Switching modes is just as easy as picking up the alternate handpiece and pressing a button, making the ART-SP1 an absolute must for veterinary professionals looking for unparalleled control and ease of use.

For veterinary use only.

BONART

ART SP2

The twin to the magneto-style SP1, the ART-SP2 sports the same impressive pedigree in a sleek piezo package. Featuring one-touch toggling between scaling and polishing, a streamlined control panel and steam-autoclavable detachable handpiece, the ART-SP2 is the fusion of form and function personified.

BONART

ART PL3

For veterinary use only.

For the veterinary professional who demands a solid, high-speed stand-alone polisher, the ART-PL3 is a 30,000 RPM dynamo with a twist. Featuring a color-coded locking ring for worry-free polishing and the ability to add an optional contra angle for low-intensity oral drilling*, the ART-PL3 is as surprising as it is affordable.
