

AwareManager Event and Facility Management Software: World Class Venues. World Class Experiences.

Some of the most recognized and iconic venues in the world use AwareManager to deliver unparalleled stakeholder experiences. With AwareManager's unique solution, these stadiums, arenas and event venues:

- *Proactively manage all aspects of events in one system, from staff scheduling to post-event analysis.*
- *Enhance operational efficiency and response with real-time dashboards, mobile solutions and alerts.*
- *Ensure that they have the right resources in the right place at the right time.*

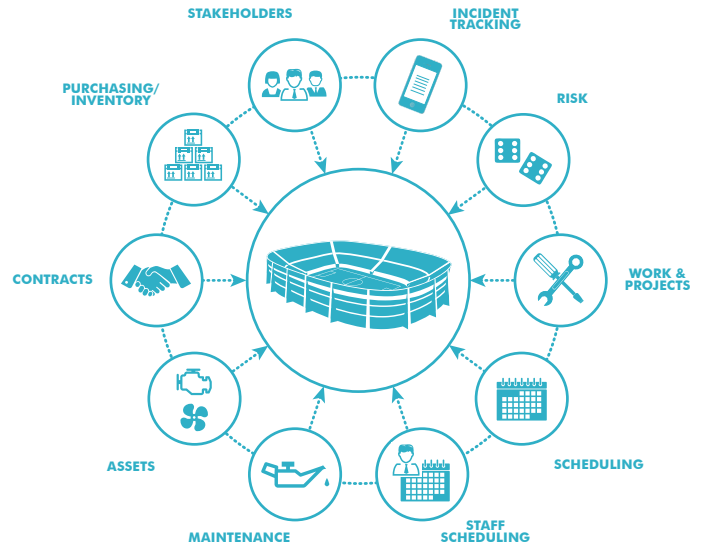

AwareManager is the most comprehensive, fully integrated and flexible solution in the industry. Whether you need an incident, work or resource management solution or

require higher-level capabilities such as risk or contractor management, AwareManager has you covered.

However, technology alone isn't the answer for stadium managers and event coordinators looking to streamline operations and deliver great customer experiences. They need the right combination of people, process and technology.

Our team, which currently works with 12 of the top 25 most valuable sports franchises as ranked by Forbes, collaborates with our clients every day to make it easier for everyone involved – managers, engineers, employees, vendors, and fans – leveraging what we've learned from the most innovative and efficient facilities. The result: you can reach new levels of performance and customer satisfaction.

One Complete Solution for Your Venue

For facility and maintenance management:

- Complete pre-event checks and inspections for all security and operations.
- Proactively maintain critical equipment and systems, ensuring all work and inspections are performed on time.
- Manage all equipment, materials, inventory, contracts and resources in one database.

For risk management:

- Better manage risk with incident tracking, pre and post-event checks and a real-time map of the venue that shows both resources and incidents.
- Manage and automatically escalate staff response when incidents arise.
- Create real-time transparency using dashboards and Red, Orange and Green analysis.

For complete event management:

- Create event templates to track personnel and qualifications, and manage individual workflows during each phase of the event.
- Communicate with all stakeholders through one central system, including mobile management and automatic notifications.
- Dynamically redeploy resources during an event as required.
- Record and analyze event data to create benchmarks to measure success.
