

JR GAUNT

Manufacturing Since 1733

Re-Established 2010

The items illustrated on this leaflet are indicative samples of the type of products that could be offered and ought not be construed as the only finishes & designs possible.

The Bentley Drinks Case from J R Gaunt & Son

JR Gaunt The classic combinations of English oak, bridle leather and sterling silver blend together superbly in these beautiful hand built drinks cases. Craftsmen work to exacting standards, moulding best leather around the oak sided and lined cabinet prior to hand sewing the seams and handles.

Solid brass locks, gun case corners and handle plates are then fitted, with every screw individually tightened and aligned by hand before lining out with bridle leather on the fold up table and pigskin suede interiors.

The twelve sterling silver tumblers (with J R Gaunt's Birmingham hallmark) featuring the classic Bentley wings are numbered on the base for place drawing or simple recognition. These can also be stacked in the upper row to allow for eight more and or small mixers to be added in the resulting spaces. With the facility to hold three bottles of your choice (e.g. Sloe gin and wine with champagne in centre) and you can be equipped with the definitive accessory for those special days out or a memorable accessory for the only car worth owning.

Options to personalise include initials or registration number on the top mounted brass plate and/or the tumblers; various colours of external leather to match or contrast with your car interior and additional extra tumblers may be purchased.

The J R Gaunt for Bentley range includes a Tottie box, Humidor case and Shotgun cleaning set, all manufactured with the same high standards, materials and craftsman attention to detail as the Drinks cabinet. Further details on request.
