Experts in stair components since 1960

With over 50 years woodturning experience under our belts, we at George Quinn can offer unbeatable knowledge and skills to those dreaming of their new home and the first impression created when entering their front door.

Years of experience and with true passion for excellence we can ensure that your dreams will be realised be it through our design efforts or that of your own when choosing spindles and newels for your staircase.

Our passion for excellence is backed by our investment in people. Experience as delivered from David, 37 years with our Company; 37 years dedication to design and quality. Or Jim, 28 years starting as an apprentice and now our Production Manager committed to all aspects of production, quality standards and customer satisfaction. As a family run business, we believe our passion for excellence has taken us from humble beginnings to become Ireland's industry leader with an enviable reputation.

George Quinn has a unique team offering unique components which allows you and your carpenter to create a staircase which is uniquely yours.

Making a style statement with your staircase

It is one of the first things you see when entering your home so little wonder staircases have become the focus of great design flair over the years. From a purely functional necessity staircases have evolved to become a key feature of any home often setting the tone for what lies beyond.

Not only can it give your home the wow factor but a special staircase can increase the value of your home and you will be surprised just how affordable it can be.

At George Quinn we combine state-of-the-art technology with innovative craftsmen to guarantee a superior product every time.

As well as our extensive range of standard designed spindles and newels, we welcome the unique challenge of one-off creations with our Special Design Service for those who require a bespoke turning for their staircase.

Achill Primed

Achill Collection

Pure elegance that stands
the test of time

The Achill range is the most successful and longest running range in our stair components portfolio. Achill adorns some of the country's finest homes. It is available in 41mm x 41mm stair rails and 91mm x 91mm Newel Posts with matching handrail and base rail. Achill incorporates plain, roped and fluted designs and now with the added addition of the primed plain spindles.

Oriel 41mm White Oak spindles with a 125mm box newel for a touch of class.

Again 41mm Oriel White Oak spindles with a 91mm Oriel post.

Oriel Collection

Fashion at the forefront

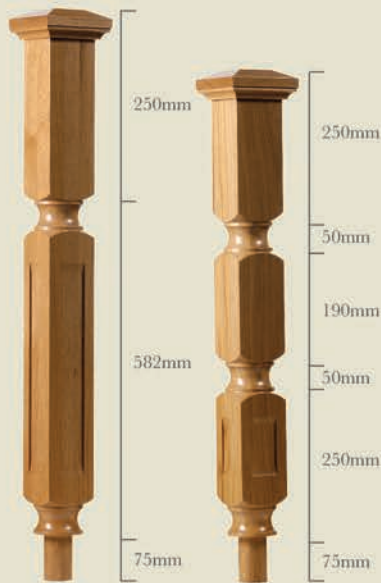

The exciting Oriel Range reflects the changing mood of today's fashion trends from more traditional styles to that of a more cosmopolitan European feel. Simplicity is the first impression coupled with a subtle hint of an exquisite wood turning effect in a rebated design. The range consists of a truly modern approach to stair design with 41mm spindles and the option of a boxed newel (above left) or The Oriel Newel (above right).

Boyne Collection

Craftsmanship at its best

The Boyne Range will take you back to times gone by, when stair design presented itself in uncomplicated, yet practical style of bare minimalism. The chamfered - turned design will prove to be a favourite with homeowners who cherish both simple shapes and traditional crafted qualities. The range is available in 41mm x 41mm stair spindles and 91mm x 91mm newel posts. A mix and match effect can be created by using the primed spindles with an Oak or Walnut Newel.

Specification

The mix and match approach to stair design shown at its most creative here. With solid Walnut handrail, baserail and steps, a primed box newel with primed boyne spindles. Just stunning.

Corby Plain Spindle

Corby Fluted Spindle

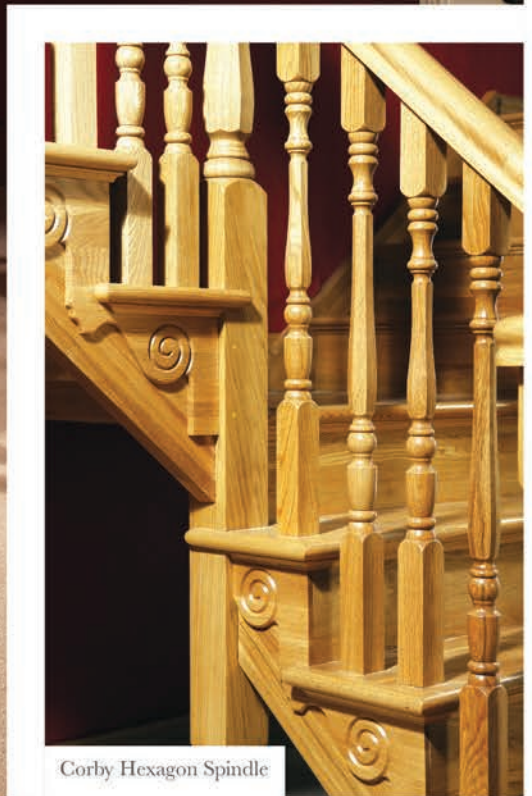

Corby Collection

A touch of class

The Corby Range highlights the skills and capabilities of our portfolio. Corby offers three different designs which include the unique hexagon profile. With a 46mm x 46mm spindle and a ball top newel, this is a range that oozes taste and design.

A statement of pure elegance. A staircase incorporating a Bullnose step with a Scroll and Wreath and our unique Corby Hexagon Spindles – a true masterpiece.

White Oak Concra square turnings are a solid statement that will last generations.

For the larger hallway, guest house or hotel the Conkra 118mm newel post and 56mm spindle is perfection.

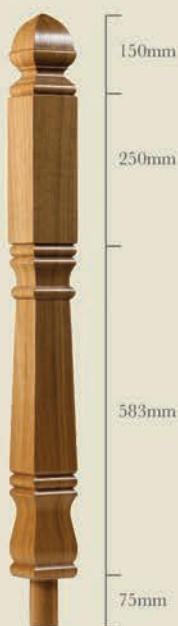

Look close at the remarkable design detail of our square Conkra range in White Oak.

Conkra

Beauty personified

The Conkra Range is one of our most recent creations. It demonstrates our aptitude and creative skills proving that turnings need not necessarily be round. Conkra gives the sense of strength and solidness which will carry through time and fashion trends. Spindles are offered in 41mm x 41mm and Newels 91mm x 91mm or for the larger entrance hall why not choose the heavier 56mm spindle with a 118mm newel posts specially for your home.

The mix that is possible with the Erne collection is magic. Here with Walnut Newel post and Walnut 46mm spindles with a stainless steel inserts. This is modern but subtle.

Ok like the design but not the mix then we can do it timber only.

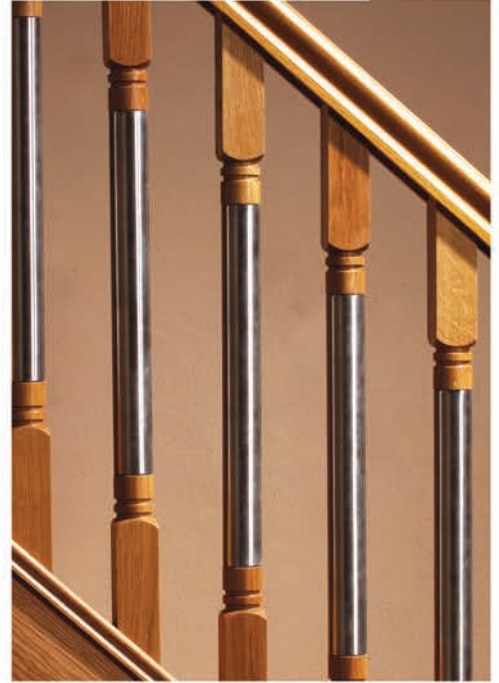

Erne Collection

Pure indulgence

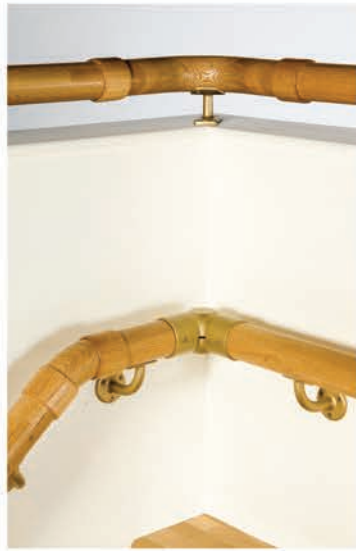

The Erne Collection simple elegance. No frills, no fuss just pure sleekness and proof, if needed, of the beauty of materials given to us by nature itself. However, should you wish to envelope the latest trends in material mix why not consider the inclusion of metal to give that modern touch to a traditional ideal.

The stainless steel inserts complement the White Oak.

White oak Erne collection.
