

**Since 1957**

Les Établissements POLKA fabriquent depuis 1957 des machines de production en continu de produits alimentaires. La société a acquis une position de leader et d'expert dans le domaines des systèmes automatiques de production de pain moyen-oriental dit *pita*. Les machines POLKA sont fabriquées «sur mesure» et satisferont donc de manière précise vos exigences les plus rigoureuses.

Nos installations de production automatique peuvent atteindre des débits de 18.000 unités par heure et nos machines semi-automatiques peuvent atteindre des débits de 2.000 pains à l'heure.

Les fours en tunnel de POLKA sont reconnus comme les systèmes de boulangerie les plus modernes du monde et les plus rentables et sont disponibles sur tout le globe.

Nos techniques spéciales de fabrication vous garantissent la fiabilité la plus élevée ainsi que des décennies de fonctionnement impeccable. Notre support après-vente spécialisé - joint à notre attention continue aux normes futures et aux technologies d'avant-garde - nous permet d'offrir ce qui se fait de mieux en matière de machinerie et de services.

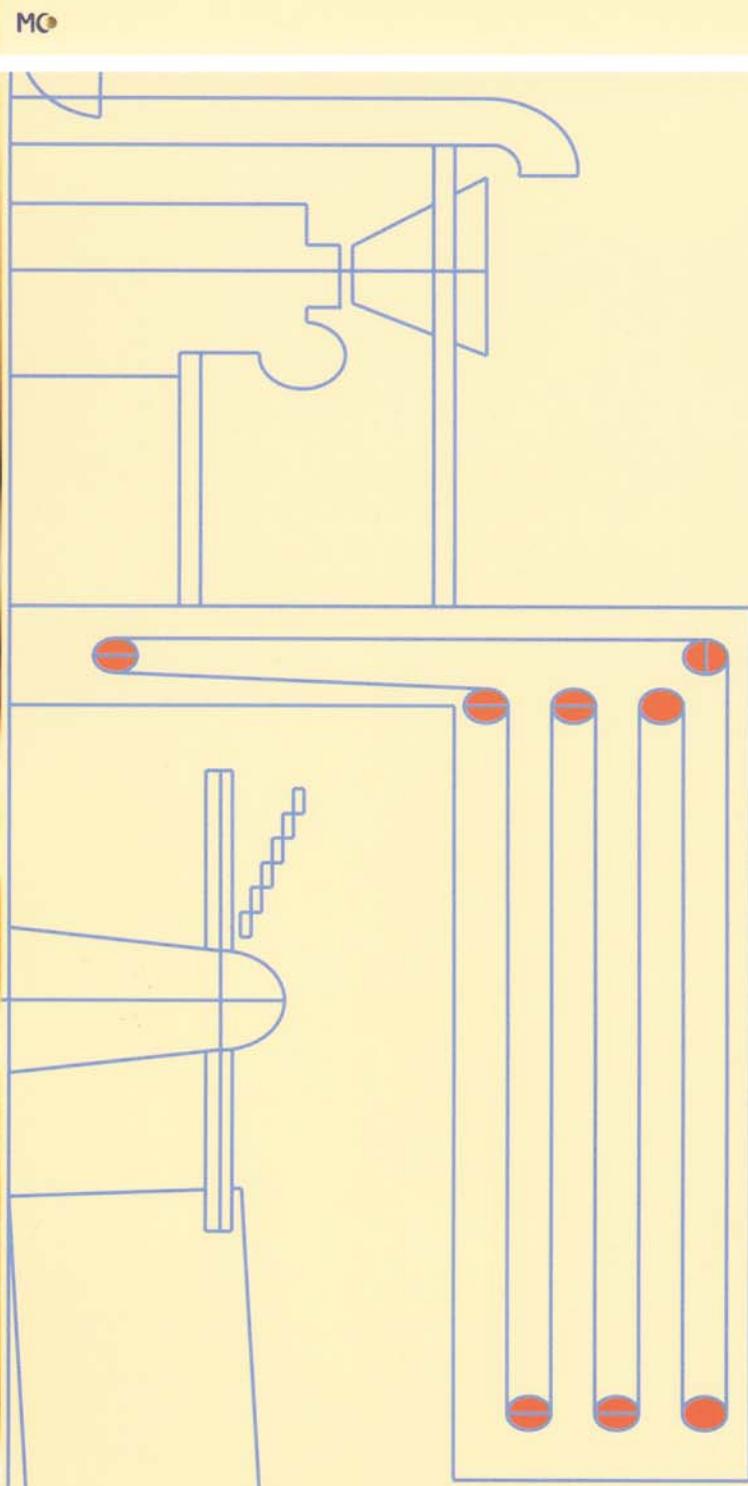

Polka Company has been manufacturing pita-bread bakery equipment since 1957. The company established itself as a worldwide leader and expert in the field of pita-bread production systems. Polka special manufacturing methods, coupled with decades of impeccable performance assure you the highest reliability.

Polka systems are tailor-made and therefore will satisfy precisely your own stringent requirements. The automatic pita-bread line can produce up to 18.000 units per hour. The small-scale machinery can deliver up to 2500 pita leaves per hour.

A professional approach and a variety of design and engineered solutions assure you high quality. Personal support and specialization, together with our continued attention to future standards and up-to-the minute technology combine to offer you the very best in machinery and service.
