Powerful Architecture
Robust features with
unmatched flexibility.

Intuitive Design
Elegant, efficient and
easy to use.

Any Device
Work seamlessly from
any device.

Business Intelligence
Stunning interactive
reports and dashboards.

Feature-Rich Claims Environment

ClaimsXPress' robust set of features is ready out-of-the-box and completely flexible to suit any claims operation.

Custom Fields & Modules - Unlimited flexibility in configuring data fields and adding new custom modules to suit your claims organization.

Tight Integration with MS Office - Works seamlessly with Excel, Word and Outlook for integrated calendar scheduling, email and contacts.

Claims Summary - Configurable snapshot of each claim, serving as a single point from which to view all essential claims information.

Plan of Action - Focus on tasks and set priorities to advance your claims toward superior outcomes, exemplary service and faster closure.

Go Global - Support for multiple languages and currencies to serve the global community and help you expand into new markets.

Configurable Solution

ClaimsXPress is highly configurable and customizable. Using role-based security controls, clients can add their own fields to the system, rename existing fields, or prevent users from seeing certain modules, tabs or confidential information.

ClaimsXPress also features a configurable dashboard so each user can access the information that is important to them from your claims environment.

Superior Services & Support

Insurity offers the complete spectrum of implementation services and ongoing support. Clients can either turn to Insurity to manage the overall implementation, or focus on project management, data conversion and other services in partnership with their own internal resources. Insurity takes an agile approach to the implementation process which enables expedited delivery of client requirements while reducing the risk of project delays.

Clients may utilize ClaimsXPRESS' high-level of configurability to achieve system independence, or leverage Insurity's support resources as a virtual extension of their IT team. Insurity handles all support issues in-house, through system experts who provide personalized assistance as well as make online resources available so clients can find answers on their own.

Insurity Cloud

Clients get consistent, uninterrupted access to the latest version of ClaimsXPRESS, without having to make a large upfront IT investment. Insurity's underlying cloud infrastructure features world-class security, and is backed by our 100% uptime guarantee. The Insurity Cloud environment is highly available and fault tolerant and also fully HIPAA compliant. Thanks to the Insurity Cloud, your IT team spends little to no time on hardware and software installation and updates, resulting in more time to focus on your business' core competencies. Insurity performs all system maintenance, upgrades and support through the Insurity Cloud.

Business Analytics

ClaimsXPRESS delivers the information you need to improve claim results, reduce program costs and minimize future business risk, all with greater speed and agility. As an advanced business intelligence module, ClaimsXPRESS drives dashboards and a huge range of data mining and predictive analytic capabilities. Clients can create dynamic reports and access their data from anywhere, at any time.

Data cubes enable monitoring and control of top-level metrics like cost drivers and financial information. Clients can easily "drag and drop" datasets and dimensions into their analysis to generate personalized ad-hoc reports. And Microsoft Power BI extends the power of ClaimsXPRESS even further. Clients do not require extensive knowledge on how to program queries, instead they simply pose a question in natural language, and ClaimsXPRESS provides stunning charts and graphs as powerful visual answers.

"When the Insurity team performed the onsite demo, we saw the passion of their team members. The company has been around long enough that it has earned market credibility and a reputation of having an excellent solution, solid support and staff with in-depth expertise."

~Amanda Granger, Vice President of Workers' Compensation Claims, ICW Group

How Will You Benefit?

No matter your business objectives, ClaimsXPRESS offers the flexibility and advanced capabilities to allow you to meet your goals. From growth to efficiency to improved service, ClaimsXPRESS helps you:

Grow Your Business Launch new products and expand your market with a flexible platform that adapts to suit your changing business needs.

Drive Performance Boost operational efficiency, enhance decision-making and raise your bottom line with ClaimsXPRESS' business intelligence.

Improve Workflow Drive productivity and task automation among your claims staff using advanced business rules.

Empower Your Team Utilize ClaimsXPRESS' configurability to achieve independence, or lean on us as an extension of your IT team.

Deliver Consistently Satisfy and retain customers using ClaimsXPRESS to deliver timely, personalized service throughout your claims operation.

“In our evaluation, there were several factors that made ClaimsXPress stand out. First its .NET and SQL based platform made it a perfect technology fit. It has verified interfaces with our policy system, so we’ll be able to seamlessly share information between policy and claims. Insurity also offers a sophisticated business intelligence (BI) module, so we’ll be able to leverage powerful data reporting and analytic capabilities to manage our business and make strategic decisions. We were also impressed with their agile implementation process, which will help to expedite the delivery of system requirements, so we can begin to reap the system benefits sooner, rather than later.”

*~Joseph McGurrin, Vice President of Information Technology,
Pennsylvania and Indiana Lumbermens Mutual Insurance Companies*

“In our evaluation, the Insurity team overwhelmingly beat out the competition. In our RFP process, we required detailed responses to a specific set of questions. We analyzed vendor responses and found that ClaimsXpress outpaced other systems on approximately 80% of the functionality and user interface questions, so the scale was heavily weighted toward ClaimsXpress in terms of its feature set. Being user-friendly and intuitive is important because it will enable our staff to quickly ramp up, streamlining the learning curve. And combining these two key aspects-functionality and user-friendliness-ClaimsXPress easily became our system of choice.”

~Todd Venneri, Operations Manager, ALPHA Fund
