

Tom Parker Ltd

Company Profile

WELCOME TO TOM PARKER LTD

PNEUMATIC AND HYDRAULIC SPECIALISTS

Over the last forty years, Tom Parker Ltd has earned the reputation of being the “pneumatic and hydraulic specialists” but it is not just our technical expertise that has made us stand out in the industry; our people, added services, flexible delivery options and after-sales care have all contributed towards us becoming one of the leading distributors.

Since we began trading in 1972, our focus has always been on supplying innovative, high quality, competitively priced product ranges. We now offer a comprehensive range of more than fifty brands and offer connection solutions that span the entire fluid power market.

We appreciate you taking the time to learn more about Tom Parker Ltd and look forward to working with you in the future.

CONNECTING THE UK

With our head office situated in the North of England (Preston, Lancashire) and our second branch located in the South (Basingstoke, Hampshire), we can ensure a quick supply network to the entire UK. Both premises have fully stocked trade counters, technically equipped staff and on-site workshops with the capability to design, certify and test pneumatic hose assemblies up to 500 PSI and hydraulic hose assemblies up to 30,000 PSI.

LEADING PRODUCTS

Our drive to source innovative product ranges has seen us add 6,000 lines to our 2014-2015 catalogue. Produced biennially; it now boasts 30,000 carefully selected items, including a comprehensive range dedicated to safety.

We provide a variety of delivery options (including next day delivery before 10am on stock items) and tracking details by email and text message, giving you the opportunity to see the progress of your order and confirmation of delivery time.

ABOUT US

EXCITING BRANDS

Core brands include CEJN, C.P.C (Colder Products Company), CDC Pneumatics, Master Pneumatic, E.MC, Festo, Sicomat and Camozzi. They are complemented with over 50 market-leading brands, including Aignep, John Guest and Protect Air.

TECHNICAL KNOWLEDGE

Our internal technical support team and external area sales representatives are extensively trained, enabling them to offer advice when you need it most. Close links with our suppliers mean together we can solve the most challenging of connection problems. Therefore, whatever your application, we'll find the best solution for your requirements.

If you can't see what you need in our product catalogue or on our website, simply get in touch. We are more than happy to visit you and accompany you on site visits, to offer support when needed.

EXCEEDING EXPECTATIONS

Our customers' needs come first and we are committed to providing a first class service. We believe in regularly reviewing our processes, to ensure we continually improve and remain leaders in our field. To cement this, we are independently assessed by the BSI and are accredited to BS EN ISO 9001: 2008.

Proud to be members of the BFPDA; you can be assured that when you buy from Tom Parker Ltd, you buy from a company that cares.

POWERING THE FUTURE

CEJN

Tom Parker Ltd have a long-standing relationship with CEJN, that dates back to our establishment in 1972, when we began distributing their products exclusively to the UK fluid power market.

CEJN began trading in 1955, when engineering designer, Carl Erik Josef Nyberg, patented a revolutionary design that simplified the use of the coupling, whilst still providing reliable and efficient connections. CEJN have since expanded into manufacturing high performance connection components for pneumatics, hydraulics, high pressure applications, fluids and gases.

They have recently launched a range of "eSafe" quick connect couplings, that feature the same compact dimensions of a standard coupling, with the highest flow currently available on the market. Benefits include high flow capacity, low pressure drop, maximum operational productivity, reliability and energy saving.

All CEJN products are certified in accordance with ISO 9001.

- ⊕ BLOW GUNS
- ⊕ HOSE REELS

CPC

The Colder Products Company (CPC) has been manufacturing connection solutions since 1978. Distributing their products in the UK since 1979, Tom Parker Ltd shares a close relationship with this American company, which produce an impressive range of quick disconnect couplings, fittings and tubing connectors, for bioprocessing, chemical, food, life sciences, medical and industrial markets. The CPC product range includes plastic, brass and multimedia connections, for a variety of applications, as well as a custom service for more specialist needs.

CPC's latest range, the LQ4 & LQ6 couplings, are a first of their kind, specifically designed for use within liquid cooling applications. They feature a rotating, non-spill design which eliminates the risk of tube kinks. Utilising a new patent-pending technology, they guarantee ultra-reliable dripless connection and disconnection and are robust enough to withstand long-term repeated use.

WITH THE LEADING BRANDS

CDC

In 1983, CDC Pneumatics began manufacturing industrial connection solutions to meet the requirements of their local market. Over the last thirty years, they have expanded into an established global supplier, with a network spanning forty countries.

CDC provide a comprehensive range of products, including push-in connectors, polyurethane tubing, speed controllers, valves and accessories, including blow guns and tube cutters. CDC has now become synonymous with providing high-quality solutions at competitive prices.

Their new series of FluidFit® fittings are made from NSF approved non-toxic materials and are suitable for use within food and beverage lines, including both drinking water and drink dispense systems. The range can also be used with a variety of air, gas and vacuum applications.

Tom Parker Ltd are proud to be exclusive distributors of CDC Pneumatics to the UK market.

- PLASTIC PUSH-IN CONNECTORS
- SPEED CONTROLLERS
- VALVES

MASTER PNEUMATIC

Master Pneumatic, an American company, started out in the 1950's as a parts supplier to the automotive industry. As the market boomed, in the 1970's, they began to expand into other products including filters, regulators and lubrication equipment and this is where they found their particular niche.

They now manufacture a comprehensive range of products for the automotive, construction, food, beverage and medical markets; excelling in custom designed products to solve challenging filtration issues. Tom Parker Ltd is the official UK distributor for Master Pneumatic's products, which all benefit from the added security of a 7 year warranty.

Their new series 350 FRL removes particulate material as small as 5 microns from the airstream (helping to protect equipment) and removes 98% of water. In addition to this, the range features a removable pressure adjustment locking key, with a tamper resistant setting.

- LUBRICATORS
- DRYERS
- SILENCERS / RECLASSIFIERS

POWERING THE FUTURE

E.MC

With distribution rights to supply this extensive range of products exclusively to the UK fluid power market, E.MC is an exciting new addition to Tom Parker Ltd's portfolio of brands.

Specialising in pneumatic and hydraulic component systems, automation, fluid control solutions and high-precision machined parts, E.MC have over 25 years' experience and a worldwide network of distributors. With a key focus on quality, E.MC operates stringent control procedures, to ensure the highest standards are always maintained.

Their new range of low-power solenoid valves (the NC and NM Series) are available in various flow rates, port sizes and voltages; making them suitable for many applications where dependable low-power operation is required. The NC Series offers 0.5 watt power, with a life cycle of 30 million cycles and is available in 12 and 24 vdc. The larger body size, NM Series, offers approx. 0.8-0.9 watt power consumption, with a life cycle of 20 million cycles and is available in 12 vdc, 24 vdc, 110 vac and 240 vac. Operating at filtration levels of only 25 micron, they can reduce energy consumption and costs, due to the increased life of the PLC and the elimination of the need for an additional relay.

- ⊕ CYLINDERS AND ACCESSORIES
- ⊕ FILTERS REGULATORS & LUBRICATORS
- ⊕ GRIPPERS AND ACTUATORS
- ⊕ MANUAL & MECHANICAL VALVES
- ⊕ SILENCERS
- ⊕ SOLENOID VALVES

FESTO

Founded almost ninety years ago in 1925, Festo have expanded into a prestigious global company and are now known as "the engineers of productivity". They manufacture exceptionally high quality products, which span many industries, including automation, biotechnology, pharmaceuticals, electronics, food and packaging, process, water and wastewater.

Annually investing a significant proportion of their turnover back into research and development, Festo concentrate their efforts on designing products that maximise productivity and by doing so have helped cement their position at the forefront of the industry.

Offering an extensive industrial training and education programme, their didactics division and bionic learning network programme explore ideas which go beyond their core business. This investment ensures regular advancements to existing technology and future product inventions. Latest projects include the creation of bionic animals, such as a life-size pneumatically powered Kangaroo. This feat of engineering realistically mimics the movement of live animals and demonstrates the ability to conserve energy. These ground-breaking robotic inventions highlight Festo's technological prowess and continued investment into pioneering innovation.

WITH THE LEADING BRANDS

SICOMAT

SicoMat have been a reputable Italian manufacturer in the transmission fluid sector since 1985. Expanding into pneumatics, they developed a modern alternative to the heavy industrial compressed air distribution systems that are traditionally used in plants and factories.

The SicoAir ring main is an innovative system that requires far less installation time and has many additional benefits, including heat, UV and corrosion resistance and guarding against pressure drop. Adaptable for small installations, right through to large industrial production plants; the lightweight compression fittings (made from nylon) and pipe (made from aluminum) make the system easy to assemble. It is TUV tested and certified to Quality Management System ISO 9001:2008.

New product additions include the Sicominline; a ring main system that is ideal for small installations, whilst Sicoazote fittings and tube are designed for use with nitrogen based applications.

RINGMAIN SYSTEM CONSISTING OF:

- PLASTIC & ALUMINIUM FITTINGS
- 3M AND 6M ALUMINIUM PIPE
- FLEXIBLE PIPE

CAMOZZI

Camozzi are experts in pneumatic components. Specialising in automation for more than fifty years, they manufacture over 4,000 products and boast a distribution network of over 70 countries.

Camozzi pride themselves on their comprehensive range of industrial automation solutions, which are continually under development to ensure the highest quality and reliability. Their extensive selection of products and integrated mechatronic solutions includes control interfaces, counters, cylinders, FRL's, grippers, logic elements, motor controls, PLCs, proximity sensors, safety relay timers and valves for a wide variety of applications.

Focusing on their customers, Camozzi offer technical advice and support, system design and build, a programme of pneumatic training courses and a twenty-four hour cylinder breakdown service. The company is fully registered to ISO 9001.

THE FLUID POWER EXPERTS

THE CATALOGUE

Our product catalogue contains a thousand pages of carefully selected pneumatic and hydraulic components and related products. It's simple: just the highest quality, most cost effective and innovative product ranges all in one brochure. It is available in hard copy or as an interactive version, so you can easily source your connection solution wherever you are.

ACCOUNT

To apply for a credit account, simply complete the form (on the "open account" tab on our website) and return it to our Accounts Department. Your dedicated area sales manager will visit you to learn more about which products are important to you and set you up with preferential discounts. As an account holder, you'll be eligible for exclusive offers and be the first to hear about exciting new product launches.

BUSINESS DEVELOPMENT

Our specialist Business Development Team provide added services to help you gain the most benefit from your account. They offer:

- ✦ Cross referencing of part numbers, orders, quotations or part lists from other suppliers to our part numbers, with prices and delivery lead times
- ✦ Price matching - they will endeavour to match or beat any quotation you receive from another supplier
- ✦ Optional blank or bespoke delivery notes with your logo and details, which means goods can be shipped directly to your customers

E-COMMERCE WEBSITE

Our secure website enables you to make purchases at the click of a button. You can also find technical advice, download product literature and quickly and easily find what you need with our online catalogue flipbook.

Once you have opened an account with us, why not register on our website?

This enables you to purchase what you need, wherever you are, at your agreed pricing structure and then have the goods shipped directly to you or your customer.

Simply click on the word 'register', located at the top right hand corner of the homepage and fill out the registration form. Once you are set up with discounts, these will show up online.

Every time you log in, you will be able to see live stock figures and current special offers; don't forget when you place an order you will also receive an email or text message confirmation of your delivery time.

WHY CHOOSE TOM PARKER LTD?

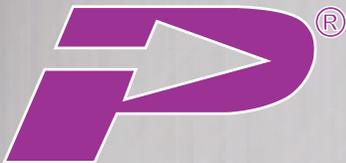

- Over forty years of offering innovative connection solutions for pneumatic, hydraulic and gas applications
- We stock, market and distribute over 30,000 high quality fluid power products, all of which are available on our website www.tom-parker.co.uk
- We strive to offer unrivalled levels of service; through product knowledge, delivery and after-sales care
- We offer flexible delivery options and email or text message confirmation of delivery time, helping you know exactly when your order will arrive
