

Steel Edging

SS4-06

Metal edging is a popular choice for commercial path applications because of its strength and durability. It can flex or be bent to easily fit the curve of almost any path.

Code	Area - approx
SS4-06A	20 m
SS4-06B	50 m
SS4-06C	100 m

Surfacing - Edging Detail

We offer a comprehensive range of impact absorbent and traditional playground surfaces. Our impact absorbent surfaces are certified to EN1177 and include rubber wet pour, grassmatting, bonded rubber shred and loose fill systems. We can undertake site preparation as required for these surfaces and our installation teams are experienced in the installation of traditional tarmac areas and can lay new or overlay existing.
