About Us

Schnell is a reputed and trusted brand for software development in the UK. Everything we do revolves around developing bespoke software applications that run on web and mobile platforms and help businesses to automate and integrate their processes.

Right from developing simple database applications that collect and store customer/stock/sales data to developing enterprise level applications (CRMs, Portals, Reports, Mobile Apps, Childcare apps, etc.) that handles £m+ of transactions and provide end-to-end business automation and integration, we know what it takes to deliver a project on-time and to budget.

In short, we:

✓ Are experts in business automation & integration

✓ Follow a unique A.R.T. IT © approach to software development

✓ Have tons of experience – Web & Mobile applications

✓ Have won several awards and accolades

We work with

Why Choose Schnell?

✓ **Our Experience**
We have successfully developed and delivered business automation by developing smart software solutions of varying size and complexity for several public and private sector organisations in the UK.

✓ **We are 'Schnell'**
The word 'Schnell' means fast/quick in German and we stick by it in everything we do without letting it affect quality. This not only applies to development and delivery, but to every technical and commercial activity we undertake. So, if time is of essence to you, you are talking with the right company.

✓ **Innovation culture**
Innovation is a habit at Schnell and we have got several award and commendation to prove the same. We encourage, enable and celebrate innovation by ensuring free-flow of ideas and best practices within our teams.

✓ **Consulting approach**
In spite of being a software company, we talk with our clients in English, without tech jargons. Along with developing the software we also offer consulting at every stage to ensure our clients can make informed decisions and make the best use of their existing IT assets and software investment.

✓ **Reliable support**
We understand the importance of reliable, dependable and timely support to ensure business continuity for our clients. Schnell has the experience to support mission critical applications and offer a range of support and SLA packages to suit every business and budget.
