

metroSTOR PCL Cycle Storage Locker

metroSTOR Cycle Parking Products

The tough, configurable and neat product strengths of metroSTOR are perfect for addressing the lack of secure cycle parking at home, at work and on the move. Available as individual lockers, secure compact stores or cycle hubs, the stylish and durable metroSTOR Cycle Parking Units can be specified for specific security and accessibility requirements, including the fitting of integral e-cycle charging systems, while optimising the available footprint using wall mount, semi-vertical, double-stack or Sheffield hoop racks.

metroSTOR PCL Cycle Storage Locker

metroSTOR PCL is an individual cycle storage locker that provides users with high levels of security in an attractive and low-profile design. Ease of use is facilitated with the integral wheel channel ensuring cycles can be stored away quickly and in an upright position.

Clear lines of sight for both security of users and the outlook of residents from associated properties are guaranteed with metroSTOR PCL. This makes the locker unit ideal for location in front gardens and communal areas.

Unique to metroSTOR PCL in locker type stores is the degree of adjustment in the secure bolt down unit plinth. This design feature enables single or banks of units to be installed in uniform line and level without costly enabling groundworks.

metroSTOR PCL is available with a wide choice of cladding and finishes to coordinate with existing architectural fabric and enable the creation of uniform street furniture across a development. This design choice is in the form of coloured options for the steel cladding together with contrasting side infill panels to elevations.

- 
Adjustable Base Design
 Unique adjustable plinth enables metroSTOR PCL units installed in uniform line and level without costly groundworks.
- 
e-Cycle Charging
 An integrated e-cycle charging system can be specified, using either mains or renewable energy sources.
- 
Customisable Finishes
 The availability of laser cut door and panels, coloured steel cladding choices and the option of contrasting side infill panels in timber make for less obtrusive outdoor storage.
- 
User Access Control
 metroSTOR PCL can be fitted with our modular lock system or customer specific user locking control as required.
- 
Relocatable Units
 metroSTOR base plinth design enables swift and economical installation on uneven surfaces allowing for relocation of the units as site requirements change over time.
- 
Secure Design
 Fully welded steel frame with security fixings ensure cycles chained inside cannot be removed even if panel integrity is compromised by attempted theft.

metroSTOR PCL Cycle Storage Locker

Model:	PCL
Storage:	1no. Cycle
Depth:	1885mm
Width:	910mm
Height:	1325mm

Can't see the size or layout you need here? Extensive custom build dimensions and configurations are available for all metroSTOR products. Please contact our sales team on 01227 200404 or email enquiries@streetspacegroup.co.uk for further information.
PLEASE NOTE: Product dimensions given are maximum external unit dimensions correct at time of publishing July 2019. All product dimensions are in millimetres and capacities in litres and do not form any part of the contract.

metroSTOR is the leading outdoor storage system for today's built environment, delivering social, economic and environmental value. Combining superb aesthetics with durability for the toughest environments, metroSTOR offers a configurable, modular product system to comprehensively address the challenges of outdoor storage; from waste and recycling bins, mobility scooters and cycles to household items, site equipment and service plant enclosures.

Mobility Scooters

metroSTOR PSL, PSM and PSH provide space-efficient, mobility scooter storage with user-friendly integral battery charging, making for safer communal areas while helping users to maintain their independence.

Waste & Recycling

metroSTOR PBL, PBM, PBE, PBC and PBH products help control waste-streams with robust enclosures and stores for all standard bin sizes. Their smart appearance and unobtrusive physical profile enable recycling centres to be located in spaces that may not have previously been considered.

Household Items & Site Storage

metroSTOR PTL, PTM and PTH are tough, versatile products providing attractive, secure storage for equipment and bulky items in an unobtrusive design. Highly configurable for capacity, layout, access, security and finishes, the proven modular system makes for ease of specification.

Cycles & Motorcycles

metroSTOR PCL, PCM and PCH for custom cycle parking solutions with the efficiency of modular build from transit shelters to cycle hubs. Stands, racks and carousels can all be specified with a number of options available for roofing, enclosure and layout type, finishes and access control.

Service Plant & Industrial

metroSTOR Custom Build is driven by the inherent design flexibility of our products, working in partnership with client input informing the design process. This enables the development and delivery of effective solutions, achieving a consistent design aesthetic.
