Dear NEDAERO relation,

With this e-mail we want to inform you about our aerospace related products and services. We will send this e-mail on a regular basis.

Tech-Tool helicopter replacement windows

NEDAERO is official distributor of helicopter replacement windows of

Tech-Tool Plastics 

We offer a full line of replacement windows for Airbus, Bell, Schweizer, Robinson and MD Helicopters. Tech-Tool Plastics produces windows that have optical properties which are exceptionally well. All windows are available with FAA-PMA.

To better serve our European customers, NEDAERO is glad to announce that important shipsets of windows are also available with an EASA STC for Écureuil series (AS350/AS355/H125), Colibri series (EC120/H120) and H130 (previously EC130).

In addition to standard windows, we offer many exclusive specialty windows. These windows enhance many helicopter operations and fulfill specific requirements requested by our customers. They include custom photography and observation windows, as well as "Cabin Comfort" windows which enhance cabin space.

NEDAERO can also take care of the repair of your broken component. Make an enquiry at our [Customer Services department](#).

Part of the family: Integra ARINC429Nav

Next to a broad range of regular ELT's we also deliver the Integra ARINC429Nav, a navigation interface providing a continual and ongoing source of GPS data to the revolutionary McMurdo Kannad

Integra (ER-N) ELT (Emergency Locator Transmitter).

This interface ensures the availability of location data when,

for whatever reason, the Kannad Integra (ER-N) ELT's internal GPS cannot receive a signal.

Meet the requirements in 2021

The Kannad GADSS ELT-DT is a fixed Emergency Locator Transmitter – Distress Tracking type, designed to meet the ICAO GADSS ADT requirement which will be applicable in January 2021.

Adaptable to any commercial aircraft, its programmable trigger-in-flight capability detects imminent distress situations and automatically sends a secure 406MHz distress signal including the accurate aircraft position.
