

Latest News: Electroheat Systems Limited are now ISN approved Grade A contractors at all UK InterGen sites. More information to come in our Autumn Issue

Welcome... to the very first edition of Electroheat Systems Limited quarterly newsletter!

Thank you for taking the time out of your busy day to read and take interest in what we do, and hopefully you will enjoy all the content we have to offer! Unlike some newsletters which have you yawning before you reach the end, our aim is to keep it short, concise and relevant with some regular features you will look forward to reading.

This will include; all the latest news and exciting updates from our business, industry and product reviews as well as some light hearted material which may take your interest.

2016 has been a memorable and exciting year already for Electroheat Systems Limited including the celebration of our 10th Anniversary! A massive thanks to all who have helped, supported and been involved in our first decade of business!

From all at Electroheat Systems Limited,
THANK YOU!

We have had a real sharpened focus on business development that includes the exciting launch of our website: www.electroheatsystems.co.uk As we carry on heading deep into the technological revolution, an online presence is a crucial business tool which we must utilise and is our window into the world.

Get ready for winter

Can you believe it's August already!

Now is an ideal time to start planning for winter and carrying out those all important winterisation checks.

We offer a **Full Trace Heating System Survey** to identify any areas which may catch your site out leading to loss of production and revenue.

If you would like to arrange an appointment or require information about our Full System Surveys please contact us at:

Nobody wants to be this guy!

May Day!! May Day!!

Andrew set himself a challenge in 2016 to take on the gruelling task of climbing Mt Snowdon.

Four years on from his stroke, this was going to push him to the limit. On a beautiful sunny day in May with support from friends and family,

Andrew successfully accomplished the challenge with flying colours!

Ground Control to Major Tom

Tom had the fantastic opportunity this June to boldly go where no Electroheat employee had been before...NASA!

As part of his HNC studies in Electrical Engineering at Milton Keynes College, he was offered the chance to attend Space University, Johnsons Space Centre, Houston, Texas.

This was a course designed and delivered by serving NASA engineers and included many engineering challenges and experiences, all of which Tom thoroughly enjoyed!

Product Review - Heating Cable

Product:

Eltherm ELP/PFA Parallel Heating Cable

Maximum Withstand Temperature:

260°C

Outer Insulation Type:

Perfluoroalkoxy (PFA)

ATEX Approved:

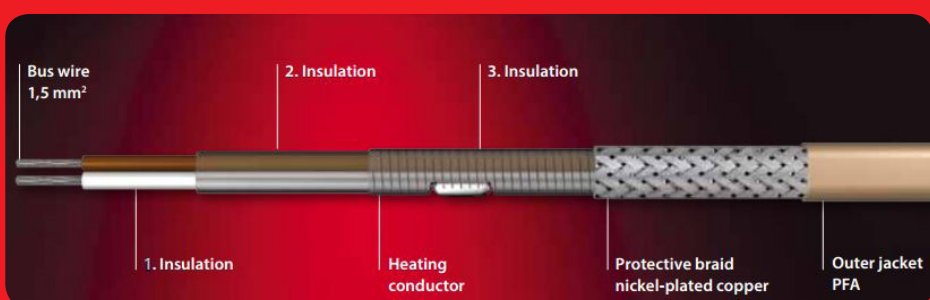

*Yes
(II 2G Ex e IIC Gb II 2D Ex tb IIIC Db)*

Range of Nominal Outputs (W/m):

15, 30, 45 and 60

Best Application:

Chemical Process Lines, Higher Temperature Lines below 260°C

A versatile parallel heating cable with a high chemically resistant outer jacket and the ability to withstand up to 260°C (de-energised).

The PFA insulation is tough and durable without losing the flexibility required for tight, complex piping systems.

We have installed large quantities of this heating cable and have been impressed with the ease of installation and trouble free reliability due to it's superior build quality.

★★★★★

5 ESL STAR RATING *(Out of 5 Stars)*
(Highly Recommended!)
