The Teaching Learning Approach

I believe ICR takes the education experience to a novel and innovative level. By means of such well explained and elucidated lesson structures, audio-visual content and increased interactivity among the students and teachers, I find a complete, experienced and refined learner in my students. The students have turned into keen learners and teachers into eager users. I must say, it has definitely value-added to our pedagogy

Dr Sahoo, Chairman, Sai International School, Bhubaneswar

There are many great features in ICR, especially the revised version, but for us two features make it a class apart from its competitors. First is the Assessment Engine which has more than one lakh questions, which has made testing quick, simple but exceedingly impactful. The second is that the content in ICR is dynamic, my teachers can add their own content to the system and create lessons that are more attuned to their classes. This flexibility is totally amazing, unlike the cookie cutter approach of other products, ICR believes in evolution as a solution, and we really appreciate that

Dr Saraswat, Principal, The Scindia School, Gwalior
