# SUMMIT INSYNC

# ANEW REVOLUTION IN DICTIONARY MANAGEMENT

Dictionaries exist for almost every application that you support. Too often the data remains unsynchronized between rings or platforms. This is typically due to lack of time and resources to perform the data entry required to keep TEST and LIVE dictionaries synchronized. To assist healthcare organizations with their dictionary management needs Summit Healthcare offers Summit InSync.

Summit InSync is a manageable data extraction, analysis, and update application that can be applied across an entire hospital enterprise. It is the industry's sought after tool to guide users through the step-by-step process of dictionary management. Use cases include:

- Routine synchronization
- Advanced clinical implementations
- EHR migration

## PRODUCT DETAILS

### Benefits

- **Immediate ROI** - Demonstrate instantaneous cost savings and workload reduction.

- **Unmatched data analysis** - Provides customizable field-level filtering to single out desired record sets.

- **Enhanced time efficiency** - Automates dictionary synchronization using preconfigured preference settings.

- **Simplified EHR migration** - Administers clean and accurate data in all dictionaries throughout migration process.

- **Prepare for Advanced Clinical Implementations** - Allows for data building during your phased clinical implementations like eMAR/BMV, CPOE, ORM.

### Features

- **E-Wizard application** - A user- friendly tool that serves as a point-and-click guide through the dictionary extraction and selection process with automated import into a sync project.

- **Color-coded analysis screen** - Provides robust filtering and flagging methods for updating.

- **Intuitive "tree list" control** - Displays dependant and related data from even the most complex dictionaries.

- **Handles any EHR platform** - Also, supports multiple facility setup.

- **Powerful discrepancy reports** - Analyzes trends as data changes over time.

## SUMMIT INSYNC DASHBOARD

Summit InSync has revolutionized the way organizations approach dictionary management and synchronization. Stop the NPR reports, excel spreadsheets and headaches.

## SUMMIT HEALTHCARE PRODUCT SUITE

***Summit Exchange***
Delivers standards-based interface support, allowing Hospitals, Health Systems, Clinics and Vendors to successfully connect disparate systems, gather and normalize data, and streamline connectivity, communication, and data exchange.

***Summit All Access***
Secure, fully audited data availability to everyone in your organization, or surrounding healthcare community, with convenient 24/7 access to the data through the web.

***Summit EMPI***
Provides for a central source of consistent patient identities and demographic data with extended support for multiple identifiers across complex systems.

***Summit Scripting Toolkit***
A workflow and task automation tool that can also be used when HL7 methods to deliver data are not an option. Has the ability to handle everything from the simplest script to the most complex interface.

***Summit InSync***
The market leading solution for dictionary/domain management through extraction, analysis and synchronization. Keep your data accurate between test and live, across multiple platforms and domains.

## PRODUCT REQUIREMENTS

| | |
|---|---|
| Operating System | Microsoft Windows version: 7, 8, Server 2008, or Server 2012 |
| Minimum Memory | 4 GB RAM |
| Minimum Hard Disk Space | 150 MB for base installation plus an additional 100 GB for log files |
| Minimum System Processor | 2 gigahertz (GHz) or faster 32-bit (x86) or 64-bit (x64) processor |
| Required Software | .NET 4 Framework or higher, Microsoft SQL Server 2008 or above, any PDF viewer |
| Minimum Resolution | 1024x768 |
