K-Prema

For the internal repair, rehabilitation, maintenance and installation of pipelines that have a diameter ranging from **500 to 4000mm**.

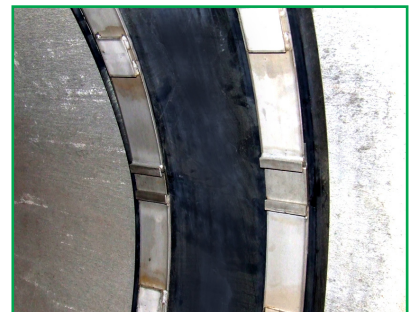

Manufactured to suit a range of drinking and sewage water, oil and air applications, the K-Prema Internal Pipe Seal can be utilised on an array of pipe materials including concrete, steel, cast iron, PE, glassfibre and other materials.

The system provides an efficient method of sealing pipes that are damaged due to corrosion, displaced joints, tree roots and ground movement.

The sleeve is manufactured from EPDM rubber and the clamping bands are produced from a high grade steel.

Benefits

- Eliminates the need for excavation
- Reduced risk of disruption to services or other works
- WRAS Approved - suitable for potable water applications
- A cost effective solution
- Provides a durable and watertight seal
- Can be used to repair a variety of pipe materials
- High maximum internal pressure - 20 bar (290psi)
- Suitable for potable water, sewerage, water, oil & gases

WRAS
APPROVED
