

Entropia Ltd - Environmental Policy

Entropia Ltd is a heating and plumbing contractor. We are committed to sustainable development through initiatives that reduce energy use, materials use, waste and pollution. We aim for continuous improvement in our environmental performance, using recognised environmental best practices wherever possible.

Our environmental policy outlines our commitment to operating as a responsible business by:

- Ensuring compliance with current legislation, regulations, codes of practice and other requirements on environmental matters relevant to our operations.
- Committing to an on-going reduction in energy and resource consumption.
- Minimising the impact of Entropia activities, products and services through effective waste and recycling management.
- Promoting sustainable product design and construction, using low carbon energy resources wherever possible.
- Training employees and ensuring environmental awareness and commitment throughout the company.
- Working with our suppliers, contractors and partners to promote improved environmental performance.
- Responding quickly and effectively to any environmental incidents involving Entropia facilities, staff, subcontractors, equipment, working environment or products under our control.

This policy statement is reviewed annually by Entropia Ltd.
