Design Process

From ideas ... to real world solutions

New product development has been a defining element throughout our history.

The nature of our products is such that they must be designed to resist the numerous challenges faced within the urban landscape. All products are designed and built to ISO 9001 QA standards and certified by structural stability and stress analysis as appropriate.

We make it our top priority to only use materials in our products that offer the highest resistance to the effects of weather and vandalism.

We continuously enhance our product range and pave the way in the market by introducing unique products.

Working together with our innovative design team, we want to provide real world solutions, tailored to meeting your needs.

U.K. REGISTER OF PRE-QUALIFIED CONTRACTORS SERVICES

Certificate Number 16750
ISO9001, ISO14001

Cycle Storage

Provide cover and security with the Glasdon range of bike shelters and motorcycle storage. From contemporary styled shelters to enclosed steel-framed compounds, we'll have an outdoor bike storage solution that meets your requirements.

■ Aero™ Cycle Shelter

DESIGN FEATURES

- Provides storage for up to 10 bicycles.
- Curved design helps natural fall-off of rain and snow.
- Durapol Material ends will not rot, chip or rust.
- Air gap at rear means less litter getting trapped in the shelter.
- Never needs painting.
- Tested in a wind tunnel at winds of up to 60mph - no damage.
- 8 fixing points provide stability and reduce ground leverage.
- Optional PETG end panels provide added weather protection.
- Choice of cycle parking options - 8 or 10 place 'toast rack' cycle hoops, or individual Sheffield cycle stands.
- Supplied fully assembled ready for immediate fixing to a prepared concrete base.

DELIVERY

Delivered fully assembled for immediate base fixing by the customer. If site access is restricted Aero can be delivered in kit form and assembled by Glasdon at an additional cost.

INSTALLATION

Aero cycle shelter is supplied ready for immediate surface fixing on to concrete using the expanding anchor bolts supplied. The minimum base size required is 4400 x 2000mm. The base should be flat, level and a minimum thickness of 200mm concrete on to hardcore.

AVAILABILITY

Usually within 4-6 weeks of order.

MODELS

AE001 – Shelter only for Motorcycles
AE201 – Shelter only for Motorcycles with side windows kit

AE080 – 8 place galvanised toast rack
AE085 – 8 place toast rack with Armortec® coating
AE280 – 8 place galvanised toast rack with side windows kit
AE285 – 8 place toast rack with Armortec® coating with side windows kit

AE100 – 10 place galvanised toast rack
AE105 – 10 place toast rack with Armortec® coating
AE210 – 10 place galvanised toast rack with side windows kit
AE215 – 10 place toast rack with Armortec® coating with side windows kit

SPECIFYING

1. Decide whether cycles or motorcycles are to be stored.
2. For cycles, select from 8 place toast rack, 10 place toast rack or individual Sheffield Cycle Stands (optional feature). For motorcycles, select shelter only.
3. For cycles, specify either Galvanised or Armortec coating.
4. Specify with or without side windows kit.

Anthracite Grey. (RAL 7016)

Cladding: Clear.

Roof skeleton: Natural Anodised Aluminium.

CONSTRUCTION

Ends

Durapol® material.

Framework

Natural Anodised Aluminium

Cladding

4mm high-impact PETG thermoplastic glazing.

Joining Plates

Steel with Armortec® coating.

Cycle Stand

Steel with Armortec® coating or Galvanised steel.

OPTIONAL FEATURES

SIDE WINDOWS KIT

Improved protection for either one end or both ends of the shelter. Standard kit contains 6 windows to cover both ends as standard. Side windows allow clear visibility to see inside the shelter.

PERSONALISATION

Personalisation is available on the rear and side glazing panels, please contact our sales office for details.

Aero™ Corral Compound

DESIGN FEATURES

- Provides storage for up to 20 bicycles.
- Consists of two Aero™ cycle shelters joined by an Armortec® coated steel framework to give excellent weather protection and security.
- Front gate and back frame is clad with UV protected polycarbonate panels.
- Central roof structure is clad with UV protected polycarbonate panels.
- Bolt lock supplied as standard.
- Choice of cycle parking options – 2 x 8 or 10 place 'toast rack' cycle hoops.

DELIVERY

Aero Corral is delivered as two assembled Aero Shelters and a separate kit containing the front gate, back panel and roof to form the compound. This will be assembled on site by Glasdon. If site access is restricted, the Aero Shelters can also be delivered in kit form and assembled on site by Glasdon at an additional cost.

INSTALLATION

Once assembled, Aero Corral Compound is ready for immediate surface fixing on to a concrete foundation using the expanding anchor bolts supplied. The minimum base size required is 6004 x 4532mm. The base should be flat, level and a minimum thickness of 200mm concrete on to hardcore.

AVAILABILITY

Usually within 6-8 weeks of order.

MODELS

AE201 X 2 - Shelter only with side windows kit and AE400 - Aero Corral Kit

SPECIFYING

1. Decide whether cycles or motorcycles are to be stored.
2. For cycles, select 8 place toast rack, 10 place toast rack or individual Sheffield Cycle Stands (optional feature).
3. For cycles, specify either Galvanised or Armortec coating.
4. Aero Corral Compound is specified with 2 individual shelters being positioned front-to-front.
5. Specify the Aero Corral kit to link into a cycle compound.

Bi-Store™ Cycle Shelter

DESIGN FEATURES

- Stores bicycles or motorcycles.
- Bicycle storage options available with choice of 5 place rings, 8 place hoops or 10 place rings.
- Choice of blue or grey plastic-coated steel or clear thermoplastic cladding.
- Supplied ready for immediate fixing to a prepared concrete base.
- All orders are delivered to site as pre-assembled shelters and offloaded with a vehicle crane ready for immediate base fixing to a prepared thickness of at least 200mm on a hardcore foundation.

DELIVERY

Delivered fully assembled for immediate base fixing by the customer. If site access is restricted Bi-Store can be delivered in kit form and assembled by Glasdon at an additional cost.

INSTALLATION

Bi-Store Shelter is supplied ready for immediate surface fixing on to concrete using the expanding anchor bolts supplied. The minimum base size required is 3800 x 2400mm. The prepared concrete base should be flat, level and a minimum thickness of 200mm on to hardcore.

DIMENSIONS

Corral™ Cycle Compound

DESIGN FEATURES

- Stores bicycles and motorcycles.
- Multiple units can be connected together to create potentially unlimited secure cycle storage.
- Optional end cladding offers additional weather protection.
- Roof link panel with clear thermoplastic glazing available to fully enclose the compound.
- Choice of blue or grey plastic-coated steel or clear thermoplastic cladding.
- Available with choice of 5 place rings, 8 place hoops or 10 place rings per half-compound - choices can be mixed and matched.
- Supplied ready for immediate fixing to a prepared concrete base.

DELIVERY

Corral Cycle Compound is delivered as assembled Bi-Store Shelters and a separate kit containing the front gate, back panel and roof (if required) to form the compound. This will be assembled on site by Glasdon. If site access is restricted, the shelters can also be delivered in kit form and assembled on site by Glasdon at an additional cost.

INSTALLATION

Corral Compound is supplied as individual pre-assembled shelters ready for bolting together and surface fixing on to a concrete foundation using the expanding anchor bolts supplied. The prepared concrete base should be flat, level and a minimum thickness of 200mm on to hardcore. The minimum base size required will vary according to the layout of the compound - please contact our sales office for details.

Extra weather protection can be provided to each of the standard models by the addition of cladding panels to either one or both ends of the shelter.

GATES

The addition of vertically-barred single gates and infill panels to either one or both ends of the compound provides extra security. The gates have a padlock facility.

DIMENSIONS

ROOF LINK

The roof link panel offers additional weather protection and security by linking the opposite sides of the shelter. Available with clear thermoplastic glazing.

Echelon™ Cycle Shelter

DESIGN FEATURES

- Standard model is pre-assembled with rivnuts fitted into Armortec® coated holes to prevent corrosion of steel frame.
- Provides storage for up to 10 bicycles.
- Curved design helps natural fall-off of rain and snow.
- Steel frame with 3mm thick Armortec® coating to ensure long service life and low maintenance.
- Standard model supplied fully assembled using Hi-Ab vehicle, ready for immediate fixing to a prepared concrete base.
- Built to withstand strong winds and harsh weather conditions - tested by a structural engineer.
- 4 x 12mm thick adjustable feet with 3 fixing points in each to provide stability and reduce ground leverage.
- UV protected 3mm polycarbonate cladding.
- Optional polycarbonate end cladding provide added weather protection, requires self assembly using pre-drilled holes.
- Choice of cycle parking options - 8 or 10 place 'toast rack' cycle hoops, or individual Sheffield cycle stands. (see pg 5 for details)

DELIVERY

Standard model delivered fully assembled for immediate base fixing by the customer.

INSTALLATION

Echelon cycle shelter is supplied ready for immediate surface fixing on to concrete using the self-tapping anchor bolts supplied. The minimum base size required is 4115 x 2285mm. The base should be flat, level and a minimum thickness of 200mm concrete on to hardcore.

AVAILABILITY

Usually within 4-6 weeks of order.

Modus™ Cycle Locker

DESIGN FEATURES

- Secures one bike per locker.
- Robust, theft-resistant design.
- Requires minimal maintenance.
- Environmentally friendly - 100% recycled wall panels and roof.
- Highly secure T-handle lock.
- Internal locking base track allows bicycles to be locked inside the unit for a second line of theft defence.
- Vandal, impact and weather resistant.
- Minimum two units required in a bank.
- Supplied fully assembled ready for immediate fixing to a prepared concrete base.

DELIVERY

In assembled form for installation by the customer.

INSTALLATION

The minimum base size should be 50mm greater than the overall length and width shown. Assuming no suitable existing surface, the base is to be a minimum of 125mm concrete on to hardcore. The base should be flat, level and square. Base fixing is accomplished using the expansion anchor bolts supplied. Five 10mm holes for ground fixing are to be drilled in the concrete base through pre-drilled holes in the locker plinth to a minimum depth of 120mm. One 12mm x 120mm (minimum depth) hole is to be drilled for base track fixing bolt.

AVAILABILITY

Usually within 6-8 weeks of order.

EXAMPLE LAYOUTS

Wedge shape locker allows formations to suit your environment.

SPECIFYING

1. Decide how many cycles will be stored.
2. Decide the layout formation of the lockers.

Ecoboard™ Material Side Panels: Recycled polyethylene.
Framework: Vandalex® material.
Roof: 100% recycled Durapol® material.
Door & Wheel Guide: Steel with Armortec® coating.
Door Number Plaque: Stainless steel.

■ Cyclone™ Cycle Stand

DESIGN FEATURES

- Requires no groundwork and can be installed in minutes.
- Features a self-coloured plinth made from Durapol® Material with a hoop for two bicycles made from either stainless steel or steel with Armortec® Coating.
- Each plinth is filled with sand ballast for extra weight to help prevent any unauthorised movement. For added security, concealed fixing points allow for permanently bolting down to a concrete base or paving slabs.
- Designed with a wedge-shaped base plinth that allows for the formation of various layouts. Tamper-resistant linking brackets are used for securing each Cyclone Stand together.

DELIVERY

Delivered as an individual unit ready-filled with sand ballast for offloading by Glasdon. Fitting of linking brackets and base fixing is then undertaken by our customers.

INSTALLATION

Cyclone Stands are delivered as individual units (ready filled with sand ballast) for offloading by Glasdon. Subject to adequate access on site, Glasdon can usually manoeuvre each Cyclone to its final location at the time of delivery. Fitting of linking brackets and base fixing etc. is then undertaken by the customer.

AVAILABILITY

Usually within 3-4 weeks of order.

Multi-Purpose Shelters & Canopies

Whatever your application, we've got a multi-purpose shelter or canopy that will fit your brief. From waiting shelters and on-site safety fire assembly points to ATM machine canopies, Glasdon offer versatile solutions for the outdoor cover you need to provide.

Carleton™ Shelter

DESIGN FEATURES

- 9 standard layouts.
- 3 roof styles.
- Flat roof models available as self-assembly shelters.
- Panels available in toughened glass, thermoplastic glazing or blank GRP in a choice of colours.
- Fully assembled form normally delivered within 4-6 weeks of order.

For public transport applications our range of Carleton shelters can be adapted in size and configuration to meet the needs of disabled people, in accordance with the relevant Department for Transport guidelines.

SELF-ASSEMBLY SHELTER PATENT NUMBER GB2429468

For multiple roll-out programmes, remote locations and sites with restricted access, Carleton models up to a size of 3 bay x 1 bay with flat roofs can be supplied in self-assembly form for quick and simple assembly by the customer. Comprehensive assembly instructions and a DVD are provided.

AVAILABILITY

Usually within 4-6 weeks of order.

Flat roof models up to a size of 3 bay x 1 bay can be supplied in self-assembly form.

MODELS

2 BAY LONG x 1 BAY WIDE
Nominal Dimensions
2180mm long x 1115mm wide

3 BAY LONG x 1 BAY WIDE
Nominal Dimensions
3245mm long x 1115mm wide

ROOF STYLES

*Cantilever models 220 & 350 are only suitable for setting into concrete pockets below ground.

SPECIFYING

- Select the model which best suits the application, eg. 2 bay with front right entry - model 245.
- Select the roof style required. All Carleton flat roof models up to 3 bay x 1 bay can be supplied in self-assembly form. Comprehensive assembly instructions are provided.
- Specify whether the shelter is:
 - Frame with toughened glass upper and lower panels.
 - Frame with thermoplastic glazed upper and lower panels.
 - Frame with toughened glass upper and blank lower panels.
 - Frame with thermoplastic glazed upper and blank lower panels.
 - Frame with any combination of glass, thermoplastic and blank upper and lower panels.
- Select the colour scheme (if required).
- Carleton shelters are normally ordered in sketch plan form with panel selections and optional features identified as applicable.

OPTIONAL FEATURES

SEATING

GRP perch seat incorporated into lower blank panel.

PERSONALISATION

Your logo, crest or name can be etched on to the inside surface of glass panels. All we require from you is your personalisation graphic.

TIMETABLE BOARD

Aluminium with Armortec coating display board, with thermoplastic glazing, fixed to intermediate mullions.

LIGHTING

Comprising of external-quality fluorescent luminaire and dusk to dawn sensor switch all wired in surface-mounted steel conduit to a terminal box at low level.

Final site connection and fusing by the customer.

DIMENSIONS

1 BAY WIDE FLAT ROOF ELEVATION

1 BAY WIDE PITCHED ROOF ELEVATION

1 BAY WIDE DOMED ROOF ELEVATION

3 BAY LONG FLAT ROOF ELEVATION

INSTALLATION

Carleton shelter is supplied with adjustable spigoted legs for base fixing or setting into concrete pockets below ground.

METHOD

1. BASE FIXING TO A LEVEL CONCRETE BASE.

Ensure the shelter is correctly aligned prior to drilling through the pre-drilled holes in the base plate and inserting the M10 x 90mm expanding anchor bolts supplied. The concrete base should be a minimum thickness of 125mm on to hardcore.

2. FIXING TO AN UNEVEN OR SLOPING CONCRETE BASE.

Set the shelter down and adjust the spigoted legs as appropriate prior to aligning and base fixing (as in Method 1 above). Adjustment is in 20mm steps up to 100mm (see drawing). The concrete base should be a minimum thickness of 125mm on to hardcore.

3. SETTING INTO CONCRETE POCKETS BELOW GROUND.

Whilst the shelter is elevated, lower the spigoted legs into extended position to provide a 400mm leg projection and set into concrete pockets as appropriate.

Aluminium with Armortec coating display board, with thermoplastic glazing, fixed to intermediate mullions.

LIGHTING

Comprising of external-quality fluorescent luminaire and dusk to dawn sensor switch all wired in surface-mounted steel conduit to a terminal box at low level.

Final site connection and fusing by the customer.

DIMENSIONS

1 BAY WIDE ELEVATION

2 BAY LONG ELEVATION

3 BAY LONG ELEVATION

INSTALLATION

Heritage shelter is supplied with adjustable spigoted legs for base fixing or setting into concrete pockets below ground.

METHOD

1. BASE FIXING TO A LEVEL CONCRETE BASE.

Ensure the shelter is correctly aligned prior to drilling through the pre-drilled holes in the base plate and inserting the M10 x 90mm expanding anchor bolts supplied. The concrete base should be a minimum thickness of 125mm on to hardcore.

2. FIXING TO AN UNEVEN OR SLOPING CONCRETE BASE.

Set the shelter down and adjust the spigoted legs as appropriate prior to aligning and base fixing (as in Method 1 above). Adjustment is in 20mm steps up to 100mm (see drawing). The concrete base should be a minimum thickness of 125mm on to hardcore.

3. SETTING INTO CONCRETE POCKETS BELOW GROUND.

Whilst the shelter is elevated, lower the spigoted legs into extended position to provide a 400mm leg projection and set into concrete pockets as appropriate.

Display area measures 720 x 270mm.

CO-ORDINATING PRODUCTS

Glasdon Heritage Shelter can be co-ordinated with Heritage Buildings, Litter Bins and Bollards within the full Glasdon product range.

Modus™ Shelter

DESIGN FEATURES

- Available in 2 sizes - 770 Model or 1280 Model.
- Normally delivered fully assembled - flat-pack delivery is available for sites with restricted access.
- Robust double-skinned roof.

DELIVERY & INSTALLATION

Delivered fully assembled for immediate base fixing by the customer. If site access is restricted Modus can be delivered in kit form and assembled by Glasdon at an additional cost. Modus can also be supplied as a self-assembly kit for multiple roll-out programmes or sites with restricted access.

AVAILABILITY

Usually within 3-4 weeks of order (subject to quantity).

Modus™ Smoking Shelter

Modus features reduced height panels to provide 50% open wall area, for full compliance with UK Smoking Shelter legislation. Smoking area signage is available as an optional feature (see right for details). Modus smoking shelter can also be supplied with Ashmount™ or Ashmount SG® cigarette bins fitted to the Ecoboard panels. Please contact our sales office for details.

OPTIONAL FEATURES

SIGNAGE

A Durapol® material signage panel can be fixed to the shelter roof, which can be fitted with a polycarbonate graphic or left blank to allow graphics to be attached at a later date.

A Smoking area graphic is available. Personalised signage to suit a particular application can also be supplied.

DURAPOL BLANK PANEL

PERCH SEATING

Modus Shelter (770 & 1280 Standard Models only*) can be fitted with Carleton™ perch seats.

Shelters can be fitted with 1 no. perch seat 1200 to the rear panel, or 1 no. perch seat 600 to each of the side panels.

* Not suitable for Modus smoking shelters because of the reduced height lower panels.

BLANK REAR PANEL

The rear glazing panel can be replaced with an Ecoboard panel if Modus is to be located against a wall.

TRANSPARENT ROOF

Ideal for use in car parks which use solar-powered ticket machines.

- Model 5315D as shown on sketch below with curved roof, toughened glass panels and natural anodised frames
- 2 no. Ashmount cigarette-disposal units
- 3 no. Smoking area signs

COLOURS

Carleton 50 smoking shelter is supplied as standard with natural anodised aluminium framework, clear panel glazing and a choice of standard colours for blank panels. To match existing architecture choose the coloured framework with Armortec coating, tinted panel glazing and non-standard colour blank panels. Please contact our sales office for details.

SIZE AND LAYOUT

In addition to the standard models shown, Carleton 50 smoking shelter can be manufactured in other sizes and layouts to meet your specific requirements. Please contact our sales office for details.

OPTIONAL FEATURES

See page 36 for optional features available with the Carleton 50 Smoking Shelter.

INSTALLATION

Carleton 50 smoking shelter is supplied with spigoted legs to enable them to be either base fixed or set into concrete pockets below ground.

METHODS

1. BASE FIXING TO A LEVEL CONCRETE BASE.

Ensure the shelter is correctly aligned prior to drilling through the pre-drilled holes in the base plate and inserting the M10 x 90mm expanding anchor bolts supplied.

The concrete base should be a minimum thickness of 125mm on to hardcore.

2. FIXING TO AN UNEVEN OR SLOPING CONCRETE BASE.

Set the shelter down and adjust the spigoted legs as appropriate prior to aligning and base fixing. Adjustment is in 20mm steps up to 100mm (see drawing).

The concrete base should be a minimum thickness of 125mm on to hardcore.

3. SETTING INTO CONCRETE POCKETS BELOW GROUND.

Whilst the shelter is elevated, lower the spigoted legs into extended position to provide a 400mm leg projection and set into concrete pockets as appropriate.

Glasdon High Performance Materials

Glasdon products are manufactured from high performance materials and undergo stringent quality checks to ensure durability and best value. We have accreditation with ISO 9001:2015, underlining our commitment to provide quality products.

Throughout this brochure reference is made to the following materials:

Armortec® corrosion resistant coating is specially formulated to extend the life of Glasdon metal products and components used externally.

Durapol® material is a polymer formulated to withstand extremes of temperature and is impact-tested in our Quality Assurance Laboratory as part of our BS EN ISO 9001:2015 test procedure. Durapol® material will not chip or rust, is easy to clean and never needs painting.

Ecoboard™ material is manufactured using a combination of virgin polymer and post consumer plastic waste to create a very robust and strong panel. Ecoboard™ material will not chip or rust, is easy to clean and never needs painting.

Vandalex® material is an aluminium alloy engineered to produce a high modulus of elasticity, which offers increased impact absorption properties. Its anodised finish will not rust, is easy to clean and never needs painting.

All Glasdon products manufactured from Durapol® material, Vandalex® material and Stainless steel can be recycled at the end of their service life.

Ongoing Quality

Our products performance doesn't end here

All products go through a rigorous process of testing to ensure that they are fit for purpose. We place great emphasis on material selection, efficient manufacturing and we never sacrifice quality for price.

WIND TUNNEL TESTING AT MIRA

Tested in the MIRA wind tunnel, Aero Cycle Shelter withstood speeds up to 60mph (Gale Force) and remained completely undamaged.

Smoking Area Signs

Workplaces are required by law to display 'No Smoking' signs in or on any premises affected by the ban.

Sign variants 1, 2, 3 and 4 can be supplied as either an A4 polycarbonate plaque or an A4 vinyl sticker. The polycarbonate plaques are rear printed to protect the sign face from impacts or scratches, and are weather, UV and vandal-resistant. The vinyl stickers are durable and hard wearing and are suitable for indoor use. Sign variant 5 is available as a front and rear printed 88mm diameter sticker, which is ideal for mounting on glass where the sign is required to be viewed from both sides.

1 Smoking Area Sign

For use in designated Smoking Areas.

2 Legal Sign for Scotland

Conforms to Scottish smoking sign legislation for displaying at entrances to smoke-free premises.

3 No Smoking Sign

For general use around smoke-free premises.

4 Legal Sign for England and Northern Ireland

Conforms to English and Northern Ireland smoking sign legislation for displaying at entrances to smoke-free premises.

5 No Smoking Sign

For displaying in smoke-free vehicles and ideal for use on glass doors throughout smoke-free premises.
