

WEATHERPROOFING ADVISORS LIMITED

Superglass Ltd Stirling

SPOTLIGHT ON **PROJECTS / FLAT TO PITCH CONVERSIONS**

Weatherproofing Advisors Ltd were appointed by Superglass Ltd to carry out the refurbishment of the existing production line roof at their Insulation Manufacturing Plant in Stirling.

The works involved the safe removal of the existing aged glazing system and the installation of new double skin translucent rooflight panels along with the overcladding of the existing corrugated asbestos cement roof with a new insulated plastisol coated steel roof.

Following a detailed survey of the roof structure a full schedule of works was prepared by Weatherproofing Advisors which incorporated safe access, internal safety netting, air monitoring, glazing replacement and overcladding the aged asbestos cement roof panels.

The works were carried out whilst the production facility was fully operational. Working closely with the Superglass Management team allowed us to carry out the full works with minimal disruption to the day to day operations.

The roof is now watertight and the building is benefiting greatly from the improved light transmission through the new rooflight panels.

“Your people were professional, responsive, and had a good attitude. We would be more than happy to use your company again.”

Brian Smith, Facilities Manager
