

# ColorEdge

ARBORITE

Arborite ColorEdge, with solid color through to the core, creates a clean, refined look for your projects. ColorEdge is the exciting new material from Arborite, the luxury solution for high-end high pressure laminate surfaces.

#### Available Products:

Winter White  
S585

Ruched Chiffon  
P391

Black  
S405

#### Product Grade Description:

Product Type CE5.  
ColorEdge High Pressure Laminates are produced for both horizontal and vertical applications where the surface must be functional, durable, high-quality, and resistant to scuff, scratch and stain.

*NOTE: Due to unique resin composition, a slight shift in color can occur with ColorEdge when compared to Arborite standard high pressure laminates. Please be sure to request a sample for color confirmation.*

#### Care and Maintenance:

The ColorEdge surface may be cleaned with warm water and mild soaps, such as those used for hands or dishes. Do not use cleansers that contain abrasives, acids or alkalis; they will damage the decorative surface. For more information regarding the installation, fabrication and assembly recommendations please visit our website, contact us at [info@arborite.com](mailto:info@arborite.com), or call 800.996.0366 for a full manual for ColorEdge, as well as all other specialty products from Arborite. Manuals can be used for your own information, for project manuals, and for provision to clients and contractors involved with interior construction and finishing.

#### Available Textures :

Cashmere (CA): A fine, matte texture finish for laminate with a slight sheen.

Gloss (GL): A flat texture with a high sheen, for an appealing, contemporary laminate look.

Structured (SR): A highly embossed linear texture suitable for woodgrains, solids and linear patterns.

#### Standard Width & Length (feet/mm):

4' x 8' / 1220 mm x 2440 mm  
4' x 10' / 1220 mm x 3050 mm

#### Product Type & Thickness (inches/mm):

CE5 (0.048" / 1.14 mm)
