

CyPad™ Visible

Identification & Marking Emitters

Cyalume is an ISO 9001
Certified Manufacturer

MADE IN THE U.S.A.

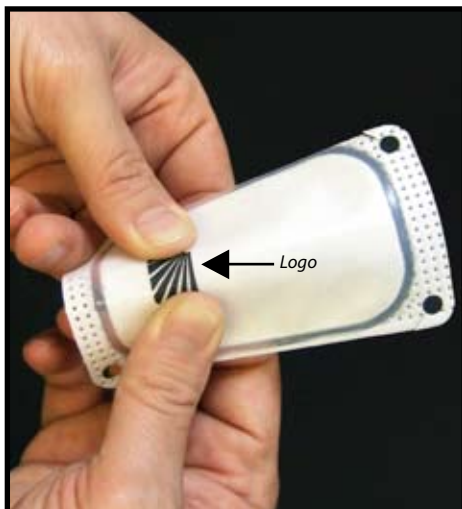

CyPad™ Visible and Infrared

- Military-grade versatile chemical light is waterproof, flat, space saving, lightweight and non-toxic
- Available in 10-Hour GREEN and RED, and 8-Hour IR
- Self-adhesive backing
- Easily marked with permanent marker for visible or covert messaging
- Designed to minimize accidental activation
- Ideal for marking personnel, hazards and room clearing

How to use

To activate the CyPad Identification & Marking Emitter, grip CyPad with your fingers and thumbs at the logo on the bottom portion of the device. Bend the plastic device to puncture the aluminum pouch within the CyPad. Squeeze pouch to release chemicals and knead with fingers and thumbs until the white pad is illuminated. Peel sticker off back to reveal adhesive to place CyPad on personnel, equipment, buildings or targets. Use hook and hole devices to hang the CyPad from wires or microfilament.

Step 1: Flex at the logo to activate

Step 2: Knead until illuminated

Step 3: Peel to reveal adhesive backing
