building local promise.

## OUR PROMISE

Our work must transform lives in ways that are tangible and **measurable**.

### ABOUT PACT

Pact is an international development organization that is creating meaningful, lasting change in communities around the globe. Our vision is a world where people who are poor and marginalized exercise their voice, build their own solutions and take ownership of their future.

## FOREWORD

We've celebrated many milestones since our founding in 1971. Among the most significant was our decision six years ago to begin measuring and reporting our results with standardized indicators. Our on-the-ground efforts to improve people's lives are what matter most. But without objective measures, how can we assess our true impact? How can we do our very best to achieve our mission?

The data in this report matter because they represent people and communities that are exercising their voices and building their own solutions. The numbers were compiled from 92 development projects in 30 countries. They span the 2016 fiscal year, from October 2015 to September 2016. They are organized as 12 global indicators that reflect our results in six areas: health, livelihoods, natural resource management, capacity development, governance, and business and markets.

Pact is committed to measuring the reach and results of our projects and sharing this data publicly. Along with local solutions and partnerships, "results" is one of our three core values, and as the first U.S. organization to comply with the International Aid Transparency Initiative, we are always working to make our assessments more rigorous. A handbook that defines our indicators and describes our methodology is available upon request, and our website, [pactworld.org](http://pactworld.org), offers interactive visualizations of our data.

For more information, contact Nanette Barkey, director of results and measurement, at [nbarkey@pactworld.org](mailto:nbarkey@pactworld.org).

## OUR INTEGRATED APPROACH

Poverty and marginalization don't have a single cause or a single solution. That's why Pact uses an integrated approach to development – one that recognizes the complexity of people's lives, finds answers in partnership with local communities and combines solutions to holistically address problems.

We work to achieve our vision with interventions in three main areas: health, livelihoods and natural resource management. And we accomplish those things in three main ways: by strengthening local capacity, by forging effective governance, and by engaging markets as a force for development.

## HEALTH

We help communities, governments, and local nonprofits and providers work together to improve health and social systems. We focus on marginalized populations, HIV and AIDS, malaria, tuberculosis, and maternal, newborn and child health. Pact also strengthens social welfare systems, such as those that serve orphans and vulnerable children.

Pact was an integral part of 37 projects that improved people's access to health and social services, across 15 countries. In all, we connected more than 2.5 million people with quality health and social services.

## LIVELIHOODS

Working in partnership, we help people gain the financial resources they need to support their families, plan for the future, cope with disasters and improve their communities. In Myanmar, Pact's Global Microfinance Fund provides critical financial services to rural borrowers, and around the world, our signature WORTH model is helping women become economically stronger.

Economic empowerment is at the core of people's ability to take ownership of their future, especially for women. Of the nearly 1.2 million people who increased their income with Pact's support in 2016, approximately 91 percent were women.

# NATURAL RESOURCE MANAGEMENT

Working with governments and local organizations, we help communities responsibly benefit from the natural resources around them, including forests, water, cropland and mineral deposits. We do this by strengthening local capacity, building effective resource management systems, and helping people develop sustainable, nature-based enterprises.

Our work in natural resource management expanded dramatically in 2016, with a new project in Ethiopia, regional project in West Africa and greater reach in Myanmar, Malawi and the Democratic Republic of Congo. Through Pact's work, more than 286,000 people benefited from improved natural resource management in 2016.

## CAPACITY DEVELOPMENT

Pact's suite of capacity development tools have helped organizations around the world improve their performance, from local NGOs and community groups to government agencies. Pact guides and mentors these partners as they broaden and deepen their capacities, enabling them to better serve their communities.

Pact improved the performance of nearly 1,000 local organizations, networks, government agencies and community committees, all of which now play key roles in the development of their societies. Because we build capacity development into much of what we do, it was a key element of two-thirds of our projects.

## GOVERNANCE

By fostering national, regional and local governance that is inclusive, transparent and accountable, Pact enables people to exercise their voices and own their future. Our efforts in this arena bring together government officials, communities, civil society and the private sector, helping them to build dialogues and cooperation.

In 2016, 32 of our projects improved governance and helped people to positively engage with officials and institutions, including in closed and semi-closed societies. Our governance work influenced 48 policy changes at the national and local levels, in Belarus, Cambodia, Nepal, Ukraine and Zimbabwe, and we leveraged social media and online platforms more than ever.

## BUSINESS AND MARKETS

Pact strengthens local economies and prosperity by using markets as a force for development. Our Mines to Markets program, for example, works in partnership with artisanal miners, governments and industry to make small-scale mining safer, non-exploitative, and more sustainable, lucrative and formalized.

In 17 of our projects, we leveraged markets as a force for positive change. We made a difference for more than 50,000 miners in Colombia, Zimbabwe, Ethiopia and Africa's Great Lakes Region.
