“Security as a
Service

Team With Industry Experts To Build Secure Systems

Not all companies have access to full service IT security teams, which is why they turn to the experts at Ventech Solutions. We partner with our clients to provide support and the advanced protection that you need, from host and code scan analysis to dedicated audits for compliance.

Working with your IT teams, we can ensure that your system release is compliant with Federal, DoD and state requirements and most importantly, keep your systems secure. Our engineers will help protect your website and source code, eliminating the worry about exposing your company and customers to cyber threats.

Proven Solutions From Industry Leaders

For nearly 20 years, Ventech Solutions has provided its clients with IT system solutions that are scalable. We can provide Security as a Service (SECaaS) to help your organization

- Design and maintain a secured system
- Deploy new systems and enhancements cost-effectively
- Meet your project timeline

Our four levels of Ventech Solutions IT Security services are CISO-in-a-Pinch, Security on Demand, Personalized Cybersecurity Consultant, and Full Security Suite and include a wide range of services to help meet your security needs.

Ventech Solutions SECaaS

	CISO-in-a-Pinch	Security on Demand	Cybersecurity Consultant	Full Security Suite
