The sleek, ultra-slim profiles of the Visofold 6000 allow the sashes to sit flush to the frame. This results in the bi-folding doors taking up minimal space when open, and therefore maximises open spaces. Offering modern aesthetics and making the most of large glass areas, the Visofold 6000 offers one of the slimmest sightlines in the industry at 94mm. Slim sightlines flood areas with light and decreases restrictions to beautiful views.

In terms of performance the highly engineered and designed Visofold 6000 includes Smarts innovative polyamide thermal break to enhance thermal performance and robust locking mechanisms to ensure security. The improved recessed rollers and guides provides a beautiful transition between inside and outside with a reliable and quiet smooth sliding action.

Fully customisable, the Visofold 6000 can open internally or externally, and has multiple opening configurations to choose from. The system is available in the full range of RAL and Smarts colours/finishes and has various threshold options.

The flexibility, design, and engineering of the Visofold 6000 makes this a perfect option for both commercial and residential projects.

## Customise your Visofold 6000 Door

### What are my colour options?

Our unrivalled colour range provides the perfect finish for every property. From contemporary urban apartments to traditional Cotswold cottages in conservation areas, we have the ideal colour to suit any project in any location. Our spectrum spans from striking shades of bronze and silver through brilliant reds and gentle blues to traditional white – with virtually every colour and finish in between.

### What about hardware?

Your choice of hardware is an important one as it will have a significant effect on the overall look of your new door. We supply a wide range of high quality options, from the contemporary stainless steel of our new Quantum range to more retro designs, all of which can be supplied in either matching or contrasting colours to your door frame; depending on the look you want to create.

### And glass?

A wide range of glass options is available as part of your window and door system. With double and single glazing, self-cleaning, gas-filled, anti-glare, coated, decorative and energy-efficient units just some of the options! Again, your installer will be able to help you with any questions and to select the most suitable product for your home
