

ACCESS to Care in the 21st Century

David Ogden – Managing Director

Taking Strength from History

Congratulations to the London Fire Brigade on their 150th Anniversary and thank you to all the emergency services across the country for their bravery and calm in emergency situations.

- We offer a **UNIVERSAL** 3rd Party access solution
- We do **NOT** discriminate between any door or door furniture
- We **ALLOW** immediate, authorised, emergency access 24/7.

You can have the best Telecare/Telehealth sensors and solutions set up inside a home, but in the case of an emergency, its ALL about access.

Access = Time best spent

When specifying care packages it is vitally important to consider access in the potential case of emergency.

By doing so time will not be wasted but spent where it should be - with the person in need of care.

Historic Means of Access

Access

Ensuring you have a trusted, dependable access solution prevents the needless cost & distress of having to kick your client's door down in the case of an emergency.

Sharing is Caring

Think about WHO needs to know information about access in the case of emergency or to administer home care.

Think about HOW you keep that data up to date and shared.

Key Safe Code of Practice.

Have ONE universal solution so there is NO confusion at the point of need.

Fit for Purpose

Consider every possible eventuality when it comes to access and determine how your chosen solution will fair.

Does the solution have a **PROVEN** track record (i.e dependable ?)

If its electronic what happens if it fails ?

Collaboration is Power

Talk to the Emergency Services in your area to register access solutions with the call centres to be used by either resource in the case of emergency.

We are **TRUSTED** by our clients to provide an excellent service with **QUALITY** products.

We are **PASSIONATE** about providing emergency access solutions to people and properties, be it commercially or residentially. We actively promote independent living.

Residential Access

The **C500** is the **ONLY** mechanical KeySafe to achieve LPS 1175 Level 1 security rating which means it has undergone a series of rigorous and demanding tests devised by security experts to the same standard as an external door.

The only mechanical key safe tested to the same standard as an external door, recommended and approved by the Police.

Commercial Access

Promoting Independence

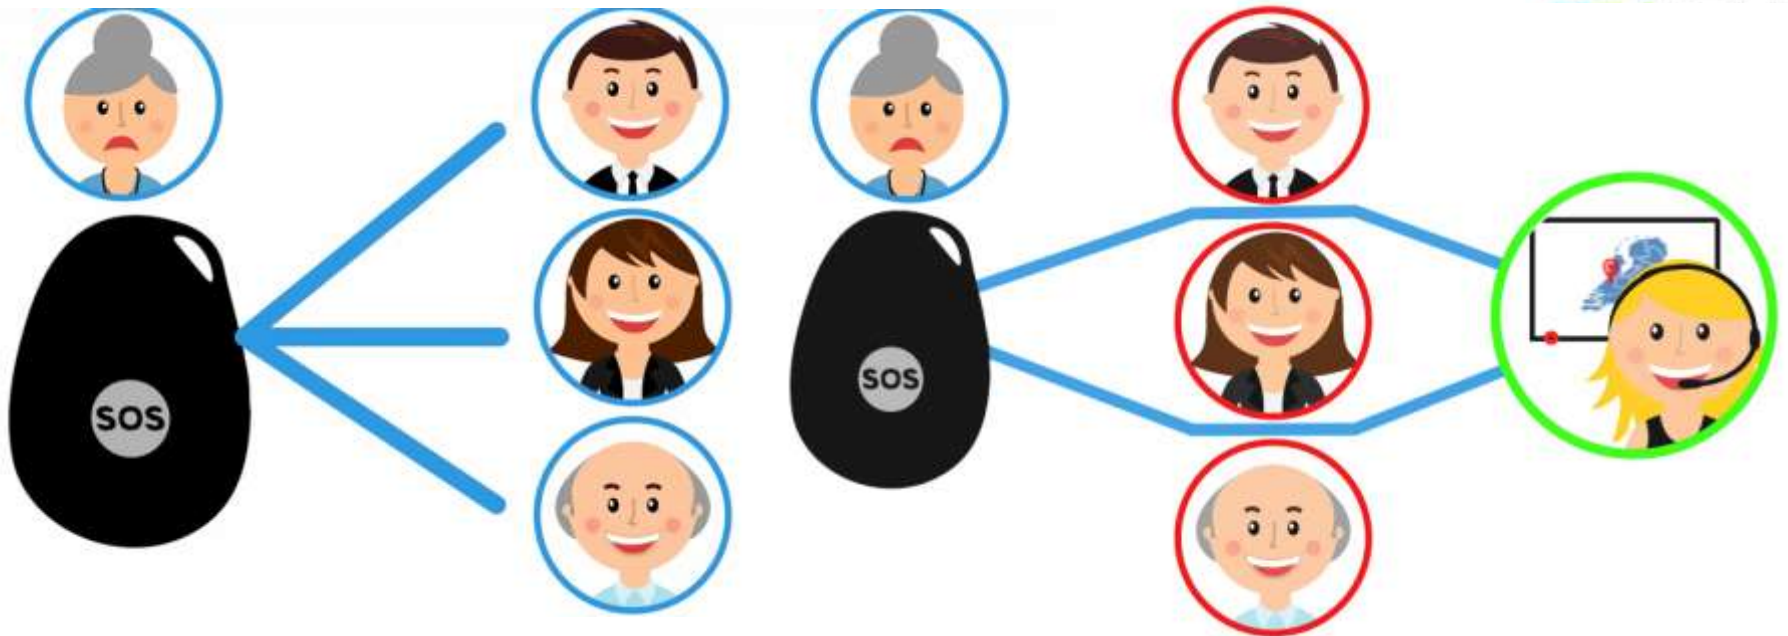

Independent living is so much more than being able to live in your own home – it's about being free to go to the shops, tend to your garden or visit family safe in the knowledge you can call

Things to look for ?

- Is the solution a quality product?
- Is the solution reliable?
- Is it a trusted and a proven solution?
- Is the provider an expert in their field?
- Does the provider offer support and training?
- Is the solution fit for purpose?
- Does the solution have the required accreditations and relevant testing?
- Does the solution fit your duty of care?
- Would you install it on your own property?

"Price is what
you pay.
Value is what
you get."

~ Warren Buffett
