

ABOUT US

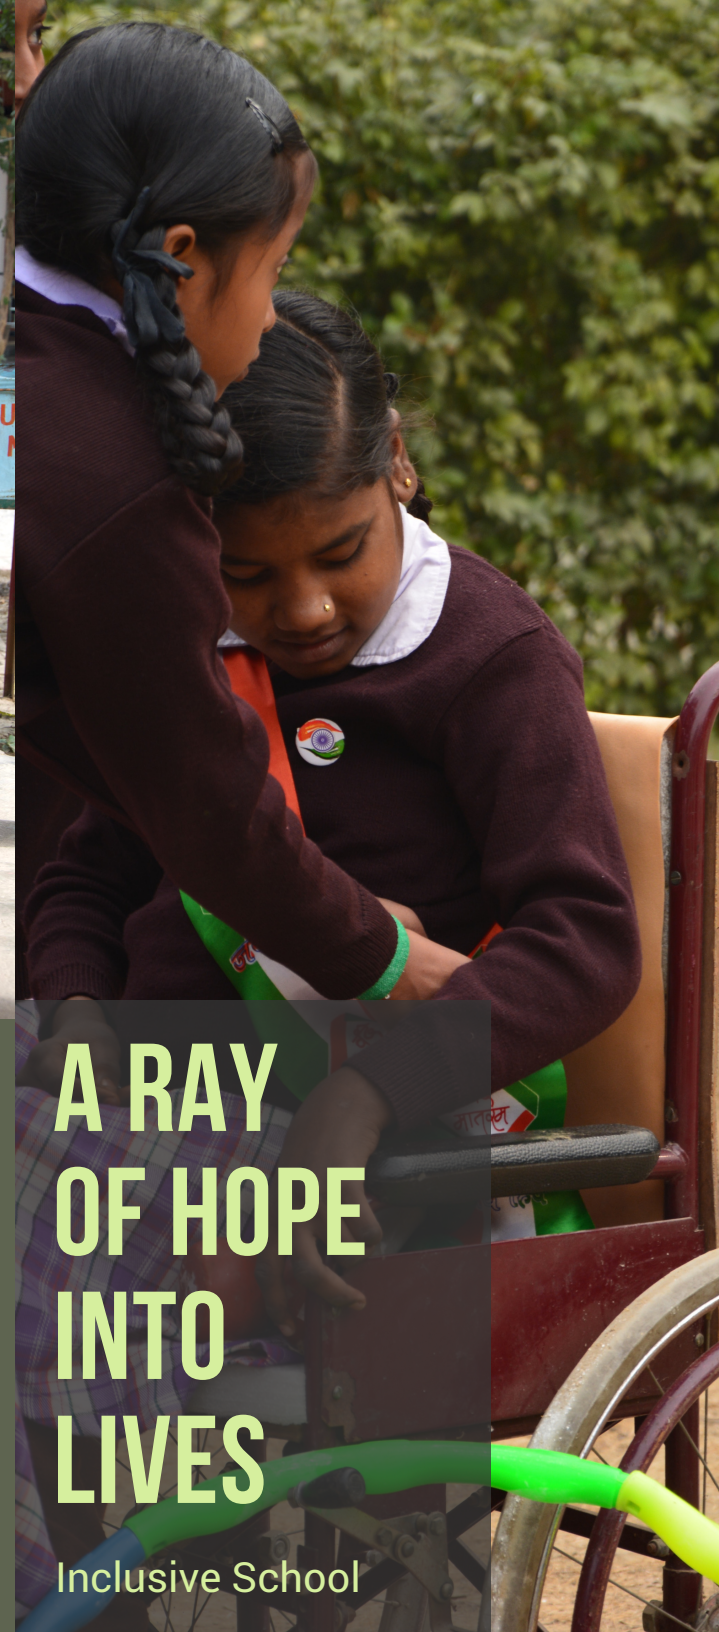

KIRAN is a center for rehabilitation, education, and vocational training of differently-abled children and young adults.

Today, families and individuals from Varanasi and the surrounding districts in over 54 villages access our services.

KIRAN is an inclusive meeting point for children and adults with disability and their families, as well as those without disability, to come together to help and learn from each other and strive together to create a more beautiful and united world.

KIRAN aims to give these individuals the tools to lead dignified and independent adult lives.

WHY CHOOSE US ?

OUR VISION

A world which ensures the inclusion of the marginalized and differently-abled children and youth into mainstream society by empowering them to discover and use their skills for the well-being of all.

OUR MISSION

To enable differently-abled children and youth from marginalized families to get rehabilitation, education and vocational skills training, so that they are empowered to take care of their needs and become fully included into mainstream society.

OUR EXPERIENCE

Since 1990, KIRAN is welcoming children and youngsters with special-abilities. We remain in constant touch with the children's and youngsters' families, discussing medical conditions, educational issues, as well as providing them counseling and support.
