

S. HIMMELSTEIN
& COMPANY

*The World's Best
Torquemeters Since 1960*

Issue #26 2018

Dedicated to Torque Sensing Solutions

S. Himmelstein and Company was established in 1960 with a goal to provide you with the best torque sensing solutions available. From then to now, our focus has been solely on torque measurement. This singleness of purpose allows us to offer you many advances in sensor technology and types of torque sensors. Continuous engineering efforts provide the most up to date and accurate torque measurement devices available. Types of torquemeters include rotating, reaction, spline drive, square drive, C-Face, pulley style, automotive wheel, and more.

In addition, Himmelstein continues to maintain the broadest available range of ISO17025 accredited torque calibration services, from 10 ozf-in to 4,000,000 lbf-in. Accreditation is through NVLAP, an arm of the United States NIST, lab code 200487-0.

When you require the best technology and customer service, we are here for you. If you have special requirements or a need for any of our products or services, call or [contact](#) our specialists.

Compact and Cost Effective Torque Sensors

Do you need a torque sensor quickly? Himmelstein's MCRT® 48200V Compact, Non-Contact Digital Torque Sensors have a lead time of 1 week with exceptional accuracy of 0.15%; 200% overload capacity; inherent noise tolerance; and a wide temperature range. [Find out more!](#)

Need an NVLAP Accredited Lab?

Himmelstein's Torque Calibration Laboratory has an Accredited Measurement Uncertainty consistent with our product specifications. Himmelstein's Torque Calibration Laboratory is ISO 17025:2005 accredited by NVLAP, an arm of the NIST, lab code 200487-0.

Ultra - Precision

Ultra-Precise Strain Gage Torquemeters

The Model MCRT® 48800V/48900V Series' standard accuracy is $<+0.04$. Their out-standing performance is due, in part, to industries highest overrange which avoids clipping real-world torque peaks and torsionals. Also enhancing performance is elimination of pots subject to misadjustment under vibration and by unauthorized users. [Contact us](#) for the specs

Use this fully-interactive calibration services website

Need your torque meter calibrated? Visit our user-friendly website dedicated to calibration. You can register your product, request a quote or RMA, and read technical memos on Calibratenow.com.

Events

We will be celebrating with Offshore Technology Conference at their 50th exhibition in Houston April 30 - May 3, 2018. Come see Steve Tveter, Cyndi Rude, and our torque sensors in booth 4277!
