BONE MARROW TRANSPLANT

Bone Marrow Transplant Asian Centre for Bone Marrow Transplant provides a ray of hope to patients through its dedicated and state-of-the-art Stem Cell Transplantation Centre dealing with Blood Cancers and other blood related diseases. The Centre is managed by widely experienced specialists and fully supported by round-the-clock laboratory and transfusion services, along with a dedicated radiation oncology unit and reports outcomes to national & international registries (ISCTR and CIBMTR). It is also a DKMS and NMDP participating centre for MUD transplants.

The Centre offers both Allogenic and Autologous Stem Cell Transplant using Bone Marrow, Peripheral blood stem cells and Cord blood stem cells for various benign and malignant disorders like Thalassemia, Aplastic Anaemia, Leukemias, Lymphomas, Multiple Myeloma and Advanced Pediatric Solid Tumours in addition to streamlined donor search coordination for highly efficient care. The centre is fully equipped with facilities for Haploidentical & MUD transplants.
