# **Product Information**

# Polyplast PY Screen Inks for Plastics & APR Varnish Alcohol/petrol Resistant Overprint Varnish

Polyplast PY is a fast drying, high gloss ink designed for printing onto a wide range of flexible and rigid plastics.

APR Varnish is a protective varnish for overprinting Polyplast PY and other suitable inks, where optimum chemical and mechanical resistance is required.

#### **Plastics**

Certain plastics may be impregnated with lubricants which, like plasticiser migration, may impair adhesion and block resistance even a considerable period after printing. This can be overcome by wiping the surface with White Spirit before printing. Surface adhesive left from protective papers on rigid PVC and acrylic sheets should be thoroughly removed in line with supplier's instructions.

Certain plastics can become brittle when printed, possibly to the point of shattering, often only after several weeks. It is therefore essential to check compatibility between ink and plastic to guard against this problem.

#### **Double-sided Stickers**

Polyplast PY inks may be used to produce double-sided stickers. Prior to such use please consult your Sericol supplier. Owing to the complex nature of this type of work printers must satisfy themselves, before starting a production run, that their substrate and production method are compatible with the ink. PY500 Obliterating Grey is recommended as the barrier coat between the first and the second side

#### **Outdoor Use**

Accelerated weathering tests have been carried out on prints produced using Polyplast PY inks in a Marr Weatherometer on the BS 3900 F3 Cycle. Under these conditions Polyplast PY, with the exception of individual colours mentioned below and the Polyplast transparents, withstood 2000 hours (comparable to approx. 24 months outdoor exposure in the UK or similar climate) of testing before significant colour deterioration was evident.

Colour matches intended for outdoor use should not contain PY113 Mandarin Orange, PY164 Seritone Red (BS), PY064 LF Light Yellow/Seritone Yellow (GS), PY078 LF Light Chrome and PY114 LF Deep Orange/Seritone Orange. For some colours it may be necessary to use the Seritone 'B' matching system or colours from the PY EL colour system.

To ensure maximum outdoor exposure resistance, care should be taken to avoid the use of small additions of colour, particularly when printing pastel shades. For more information on this and other aspects weathering please refer to the guidlines in the Sericol "Printers Guide to Weathering" Hints & Tips Information Sheet.

For optimum outdoor performance. The Polyplast EL System is recommended (see information sheet 'Polyplast PY EL System')

# **Tape Acceptance**

Polyplast PY has excellent acceptance of Application and Pre-space tapes. Colours overprinted with PY433 EL Overprint Varnish or VA401 APR Varnish are also suitable for se with such tapes. However, because of variations in their tack level, the particular tape to be used should be tested before commencing a production run.

It is essential that inks and varnish are thoroughly dry before application of tapes.

# **Main Characteristics**

#### **Finish**

High Gloss

#### **Drying**

**Polyplast PY:** Jet drying: 55-65°C 15-20 secs. Air: 8-15 mins. **APR Varnish:** Jet drying: 60°C 20-25 secs. Air: 5-10 mins.

#### Thinning

Polyplast PY: 15-25% ZV557. Hot shop conditions use ZV558

High speed printing use ZV556. Fine line & slow speed use 10-30% ZV561.

**APR Varnish:** 20-25% ZV557. Slow or hot shop conditions use ZV558.

# Wash-up

Xtend Screen Wash and Cleaner. See Xtend Screen Cleaners Product Information Sheet.

#### Mesh

**Polyplast PY:** Nos.100-120 monofilament. **APR Varnish:** Nos.77-90 monofilament.

#### **Stencil Type**

Any type except solvent adhering film & Stenplex Amber. Recommended:

Dirasol 902, Dirasol 916, Indirect or 25 micron capillary film.

#### Coverage & Mesh No.

**Polyplast PY:** 70-80m²/kg/No.120. **APR Varnish:** 55-65m²/kg/No.90.

### **Applications**

Plastics; PVC, ABS, acrylics, coated polyester, CAB, 'Hi-S Cal', 'Scotchcal', cellulose acetate.

#### **Colour Range**

Base colours available to match PANTONE 1000 colours.

#### **Propertie**

Safe, low temperature jet drying. Good flexibility (suitable for vacuum forming). Light and weather resistant, with good opacity. Excellent screen stability and self-solvency. Good petrol resistance. (Excellent when overprinted with APR Varnish).

# **Co-use with other Inks**

Polyplast may be safely mixed with Plastijet XG & MattPlast MG, although compatibility should always be checked by mixing a small quantity prior to mixing for the production run. Polyplast will print over dry ink films of Plastijet XG and may be overprinted by them. Whilst Polyplast will overprint MattPlast it is not recommended that matt inks overprint Polyplast.

#### **IMPORTANT:**

Stir well before every use. Always test application fully before beginning production run as there is often considerable variance in plastics from different manufacturers and even between different batches.

<sup>\*</sup>PANTONE® is the property of Pantone, Inc.

# Polyplast PY Screen Inks for Plastics & APR Varnish Alcohol/petrol Resistant Overprint Varnish

#### **Product Resistance**

Polyplast inks have good resistance to a wide variety of solvents including petrol and alcohol. Where exceptionally high resistance to petrol is required, overprinting with VA401 APR Varnish is recommended.

**APR varnish should not be used for prolonged outdoor exposure in excess of 2 years.** Where outdoor durability greater than this is required, PY433 EL Overprint Varnish is recommended. See Product Information Sheet 'Polyplast PY EL System'.

The Polyplast ink system is battery acid resistant.

# **APR Varnish – Properties**

APR Varnish is resistant to a wide variety of products which include alcohol, petrol, brake fluid, battery acid and detergent solutions. It offers effective protection against white spirit, Shellsol A, Methonol, Butanol, Ethyl Cellosolve, Butyl Cellosolve and many other solvents. Where resistance to a particular solvent is a prime requirement, printers should test the efficiency of APR Varnish prior to production runs. Because of its hard, tough film, APR Varnish increases the resistance of prints to mechanical abrasion and similar damage.

# **Vacuum Forming**

Polyplast PY inks permit trouble free deep draw vacuum forming without mould staining on PVC, ABS, Cellulose Acetate, CAB & Acrylics.

# **Spraying and Brushing**

Suitably thinned with ZV556 Fast Thinner, Polyplast inks may be used for spraying banners and tarpaulins such as those used on curtain-sided vehicles. For brushing, ZV557 Thinner may be used though for optimum durability when decorating flexible materials, such as tarpaulins, up to 5% ZV541 Rigid Thinner is recommended.

PY025 Opaque White is not as flexible as other colours in the range and is not suitable for such applications. It is recommended that the ink and substrate are proved compatible before embarking on a production run.

#### **Colour Management**

The Polyplast PY range includes 9 Seritone base colours plus Black, White and Extender Base to produce accurate simulations of the PAN-TONE colours in the coated ('C' suffixed) section. See section 'Outdoor Use' for important information concerning resistance properties of colour matches.

The sericol package includes:

- 1. PANTONE® Colour Formula Guide
  - The original PANTONE book customised by Sericol.
- 2. Sericol Formula Guide
  - A booklet containing formulations given in percentages by weight.
- 3. Colour Manager Software

For use with IBM compatible computers. This package enables use of the PANTONE formulations plus:

- Storage facility for user's own formulations.
- · Automatic batch sizing and costing.
- · Ink coverage estimator.
- Stock control system to calculate the amount of stock and a reminder when stocks fall below a chosen (programmable) level.
- Sericol also offers a range of weighing scales and ink dispensers pre programmed with formulae to simulate PANTONE 1000 colours.
   Contact your nearest representative for details on our colour management programme.

# **Colour Range**

PY025 Opaque White has similar printing and drying properties to other Polyplast shades, but a slightly lower gloss level. See section 'Outdoor Use' for limitations.

PY025 Opaque White is not recommended where extreme flexibility is required, such as when printing banners or tarpaulins for curtain-sided vehicles

Polyplast PY Varnish is used for the following purposes:

- As a constituent of the Seritone Matching System.
- For mixing with standard Polyplast PY colours to promote transparency.
- For overprinting Polyplast PY colours to give additional abrasion resistance.

#### **Standard Colours**

#### I ead free

Polyplast:	
PY001	Black
PY010	Tinting Black
PY021	White
PY030	<b>Tinting White</b>
PY025	Opaque White

PY064 (P) LF Light Yellow/Seritone Yellow (Green Shade)

PY078 LF Light Chrome

PY066 (P) LF Mid Chrome/Seritone Yellow (Red Shade)

PY114 (P) LF Deep Orange/Seritone Orange

PY199 Warm Red

PY191 (P) LF Vermilion/Seritone Red (Yellow Shade))

PY192 LF Scarlet

PY164 (P) Seritone Red (Blue Shade) PY165 (P) Seritone Magenta

PY127 (P) Deep Violet/Seritone Violet PY203 Mid Blue

PY230 Seritone Blue (P) PY205 Monastral Blue PY236 Reflex Blue PY206 Deep Blue PY283 **Bright Green** PY325 (P) Seritone Green PY284 Monastral Green PY461 Non Tarnishing Gold **Obliterating Grey** PY500

PY462 Silver Available in 5 and 1 kg containers.

### Lead free opaque colours

PY941 Opaque LF Light Yellow
PY943 Opaque LF Mid Chrome
PY902 Opaque LF Deep Orange
PY921 Opaque LF Vermilion
PY922 Opaque LF Scarlet
Available in 5 and 1kg containers.

### **Varnishes**

PY383 Polyplast PY Varnish PY433 EL Overprint Varnish VA401 APR Varnish

Available in 5 and 1 kg containers.

# Polyplast PY Screen Inks for Plastics & APR Varnish Alcohol/petrol Resistant Overprint Varnish

# **Polyplast PY Transparents**

PY052 Primrose (Trichromatic Yellow)
PY135 Magenta (Trichromatic Magenta)
PY215 Monastral Blue (Trichromatic Cyan)

Transparent colours are designed for use on metallised films. They are made and supplied to order in minimum quantities of 5 litres.

#### Solvents

ZV557 Thinner
ZV556 Fast Thinner
ZV558 Retarder
ZV561 Vinyl Gel Retarder

Available in 15,5 and 1 ltr containers. ZV556 is available in 5 ltr units only.

#### **Universal Tinters**

A range of 10 non-fluorescent and 4 fluorescent highly concentrated colour bases for tinting. The fluorescent colours are not recommended for use with Polyplast PY, but up to 10% of the non-fluorescent tinters may be added. See Information Sheet 'Universal Tinters, Metallic Inks and Varnishes'.

# **Special Matches**

Matches can be supplied against prints, wet ink samples or to PANTONE references, British Standard, 'HKS', 'Munsell' or 'Seritone' numbers. A sample of the substrate to be printed with the number and type of mesh to be used as well as other relevant data should be attached to orders.

Minimum quantity 5 kgs.

# **Fujifim Sericol UK Limited**

- Has certification to the International Environmental Standard, ISO 14001.
- Is committed to minimising the risk to users of our products, and also to minimising the impact of our activities on the environment, from formulation through to production and supply.
- Research & development team, work to an in house Health, Safety and Environmental policy, termed 'Design for Health, Safety and Environment', with the aim of proactively developing products with the least impact on health, safety and the environment.
- Regularly review and monitor our impacts and activities, setting objectives and targets as part of a continual improvement process.
- Is committed to reducing waste through better use of raw materials, energy, water, re-use and recycling.

# Safety and Handling

Polyplast PY:

 All products, including APR Varnish, are formulated free from lead and other heavy metals and are tested to comply with the EN71-3:1995 Toy Safety Standard.

Comprehensive information on the safety and handling of Polyplast PY screen inks and solvents is given in the appropriate Sericol Safety Data Sheet, available upon request.

# **Environmental Information**

Polyplast PY & APR Varnish:

 Do not contain ozone depleting chemicals as described in the Montreal Convention.

The information and recommendations contained in this Product Information sheet, as well as technical advice otherwise given by representatives of our Company, whether verbally or in writing, are based on our present knowledge and believed to be accurate. However, no guarantee regarding their accuracy is given as we cannot cover or anticipate every possible application of our products and because manufacturing methods, printing stocks and other materials vary. For the same reason our products are sold without warranty and on condition that users shall make their own tests to satisfy themselves that they will meet fully their particular requirements. Our policy of continuous product improvement might make some of the information contained in this Product Information sheet out of date and users are requested to ensure that they follow current recommendations.
