

COBIT[®] 5 Foundation Certification Training Course - Brochure

The Next Level of IT Security Governance

What is COBIT?

COBIT stands for Control Objectives for Information and Related Technology and is a framework developed by ISACA for governance and management of enterprise IT. According to ISACA, COBIT is an IT Governance framework and supporting toolset that allows enterprises to bridge the gap between control requirements, technical issues and business risks. The framework enables robust policy development and best practices for IT control across the enterprise. COBIT clearly highlights regulatory compliance and enhances organisation's ability to increase the value attained from IT.

Key Benefits of COBIT for Businesses

- Increased value creation from use of IT
- Aligns enterprise services better to the business
- Reduce the inherent risk of downtime
- Increased user satisfaction with IT engagement and services
- Advocates development of business-focused IT functioning
- Separates governance from management
- Provides holistic approach towards business decision making

About COBIT 5 Foundation Training Course

Invensis Learning imparts PEOPLECERT accredited COBIT® 5 Foundation training, which is an entry-level course and is ideal for individuals and organisations who are looking for fundamental understanding of COBIT framework. As a COBIT 5 Foundation certified professional you will be able to showcase your understanding of the fundamentals of COBIT framework. With this credential, you clearly indicate to prospective employers that you are ready for a career in IT governance and management.
