### Trubiquity Selected to Manage EDI transactions and implement a major EDI Cloud Project for German Trading House dennree

dennree, the leading trading house for organic food and cosmetics in German-speaking countries, maintains a highly proficient logistics process for their products. To achieve the same high level of process efficiency, security and data quality for their electronic information exchange in its supply chain, dennree sought a new EDI (Electronic Data Interchange) service provider. [Read more »](#)

### New VDA Standards -- Current Situation & Developments

Currently various leading German OEMs are working on the implementation of Global Invoice VDA Standard 4938. Trubiquity's TRUedx™ solution makes it easy to transition to the new VDA 4938 standard for the electronic data exchange of accounting data as the processing of VDA 4938 is included as standard with the solution.
