

# Scodix S Digital Presses

## ENGAGE THE SENSES, PROVIDE AN EXPERIENCE

Scodix SENSE™ the breakthrough digital enhancement printing experience produced by the Scodix digital press S series, brings a new look and tangible dimension to the graphic communications printed image, creating an eye-catching, memorable experience.

### Stand out from the rest

By touching the senses with print that stands out, Scodix SENSE™ leaves a lasting impression and delivers true differentiation to the print service provider (PSP), clients and products — a must in today's highly competitive industry.

### Press range to match production needs

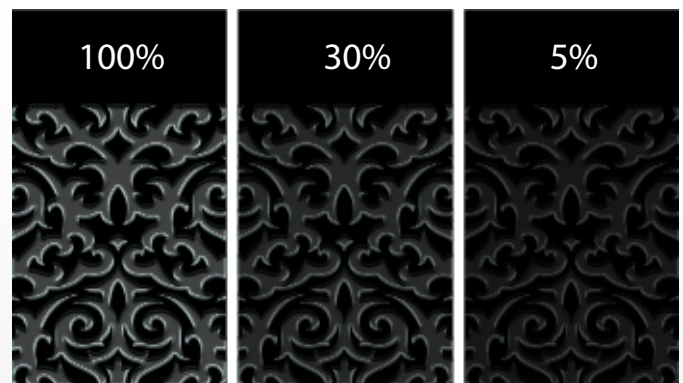

Scodix offers a line of digital presses to meet the needs of every PSP. The Scodix S series of products offer different size format and target applications for each press in the line. All presses have optional add-ons such as the Scodix Rainbow unit (a dedicated glitter station), Braille print mode, VDP capabilities based on Barcode system, and more.

### Superior quality

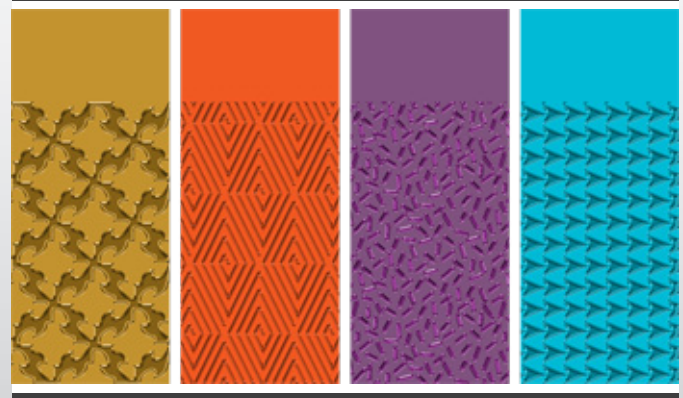

The Scodix S series presses execute unblemished, selective enhancement with Scodix's proprietary PolySENSE™ clear polymer:

- 99 Gloss Units (GU) – Highest gloss available for printed materials
- Up to 250 microns\* in polymer height – 100 times higher than selective varnish
- Variable density capabilities, ranging from 1% to 100%
- Scodix “lens effect” makes colors stand out

### Different Densities

### Scodix Patterns

**Scodix - Make SENSE**

## Image-To-Image registration

The Scodix patent pending camera system executes enhancement with pinpoint accuracy, scanning every sheet to deliver the PolySENSE™ to its exact location. This image-to-image registration method produces output that is superior to any other in the industry.

## Digital value

A completely digital solution, the Scodix S series supports barcode and variable data applications in PDF or optimized PDF formats with no need for additional complex setup. The advanced digital front end (DFE) transmits image data directly from a PC, executing print enhancement in one single step.

## Scodix S74 - Format up to B2+

A stand-alone solution compatible with offset, laminated sheets and digital print\*\*, the press automatically processes a wide range of paper formats and substrates.

- Up to B2+ size sheet format (520 x 735 mm / 20 x 29 in)
- Material weights from 135 to 675 gsm / 6 to 30 points
- Material thickness – up to 0.7 mm / 700 microns

## Environmental

A clean, green process that contains no polluting additives, Scodix SENSE™ eliminates plates, molds, chemicals, and solvents, while reducing energy consumption. Print service providers and their customers enjoy the freedom to print runs of any size on demand. Scodix SENSE™ output is nontoxic and recyclable.

\* Depends on layer thickness, substrate and print mode.

\*\* Based on the Scodix recommended list of materials. Scodix does not recommend printing directly on most toners.

\*\*\* Scodix SENSE™ coverage on the front page of this brochure is 3.79% from an A4 size sheet. The back side coverage of the brochure with Scodix SENSE™ is 0.65% from A4.
