Material information

Material	Description
ABS	Impact resistance and tough, acrylonitrile butadiene styrene is a common thermoplastic.
Polycarbonate	Polycarbonate is a durable material. Although it has high impact-resistance, it has low scratch-resistance. Unlike most thermoplastics, polycarbonate can undergo large plastic deformations without cracking or breaking.
Polypropylene	Polypropylene is tough and flexible.
Vinyl	Vinyl is a very strong, flexible and durable plastic material and is resistant to moisture and humidity.
Acetate	Acetate is cellulosic and made from a renewable resource: wood pulp.
