

Higher Pressure Delivery?

Not a problem

We can supply PiB Pumper delivery systems for injection pressures of up to 150bar, complete with control panel alarm functionality and fail safe shut down. Ideal for 'through screw' delivery

To increase the maximum pressure from 40bar to 150bar we add:

- 1 x 200 bar rated, 3 way calibration valve per pump
- 200 bar rated fittings on the delivery side
- 1 x 250 bar pressure transmitter per pump
- 1 x panel pressure display per pump with alarm and shut off protection
