

Delivery In **4** Simple Steps

1) Deliver

2) Position

3) Drop

4) Extend

The Smart Pick trailer has its own automatic steering wheels at the rear which allows the trailer to be guided in and out from tight angles ensuring incredibly fast delivery and collection even in the most space restricted sites.

Smart Pick Delivering the Future

The Smart Pick Welfare is a 12 person unit with a unique trailer system that can be delivered with a 4x4 to any site, allowing for incredibly fast, cost effective delivery and collection. A wireless remote control system along with the trailers own automatic steering will allow you to position and unload the unit from your trailer without the need for a hi-ab crane. This unique delivery system has been expertly designed in such a way that just one trailer will have the potential to deliver multiple welfare units.

This revolutionary unit features a durable galvanised steel structure with a large spacious canteen for 10 people. There is also a generous office space for 2 people with its own external door as well as a toilet and drying room.

The Smart Pick Welfare unit is compact and well balanced for ease of towing with the ability to be extended from 5.4m to 7.2m on site to offer a larger unit.

The Smart Pick Welfare unit features numerous benefits, and is set to have many uses in the future, not least within the construction industry.

Unique Delivery System

Automatic Steering For Picking Up Unit

Wireless Remote Control System
