

LABHQ | LIMS

THE LEADING LIMS FOR QUALITY CONTROL

LabHQ LIMS is the laboratory information management system perfectly designed to optimise the processing of laboratory data.

Web accessible, with minimal set-up required and supported by our team of dedicated laboratory software specialists, LabHQ is the perfect LIMS for any laboratory.

LABHQ LIMS

KEY FEATURES

Easy to use. The intuitive LabHQ LIMS user interface makes it simple to work with.

Quality compliance. LabHQ LIMS is fully validated to comply with cGMP requirements. It facilitates compliance with FDA and MHRA data integrity regulations.

Customisable. Simple system administration to manage products, tests and user permissions. Reports can be customised to meet individual business needs such as data trending.

Flexible. Customisable sample management workflow so you don't have to work around our software.

Integrated. LabHQ LIMS can be integrated to link into third party business software packages and transfer analytical results directly from laboratory instruments to ensure data integrity.

Mobile. LabHQ LIMS comes with a web application to allow remote access to data.

Cost effective. Proven to reduce sample processing costs by up to 75%.

OPTIONAL MODULES

Equipment Maintenance

Track status, schedule calibration and record equipment used for testing in the LabHQ LIMS sample audit trail.

Environmental Monitoring

Control your sampling schedule and test data to efficiently manage your programme.

Stock Management

Manage inventories, test in-house prepared stock, and record stock used in testing achieving full traceability in the LabHQ LIMS sample audit trail.

Stability Study Management

Create stability study protocols, set up alerts to ensure time points are not missed and transfer samples into LabHQ LIMS for analysis.
