

New Shredding Equipment Installed

March 2013

Evoshred shredding equipment capable of shredding up to two tonnes of paper per hour has been installed at Paper Shredding Services depot.

Customers are now able to bring along their confidential material to be shredded in house and it is possible to witness the shredding if required.

This arrangement has proved to be very popular with all kinds of customers, large and small. Certificates confirming that their material has been shredded and will be recycled can be issued if needed.

Customers bringing amounts in excess of 25 bags or boxes are advised to call in advance. We do provide a collection service and all confidential material brought to the depot will be shredded that day.

If these services are of interest please call us FREE on 0800 071 4000.
