## Technical Data Sheet

### KeyCorn

Keywalnut is a natural abrasive made from the kernel of a walnut. Key walnut is used where minimal damage is required to the substrate. It can be used on many different substrates and also where it is used at low pressures it can be recycled.

It is one of the few abrasives that can be combusted after use and also is a purely natural product.

| Grade     | Particle size – Microns |
|-----------|-------------------------|
| KeyCorn10 | 1600 - 2500             |
| KeyCorn12 | 1000 - 2500             |
| KeyCorn16 | 710 –2000               |
| KeyCorn20 | 550- 1500               |

Packed in 20 kilo paper bags shrinkwrapped on pallets.  
Single 20 kilo bags also available.

Moisture Content; 12% Max

Bulk density; 435 – 510 kgs /dm<sup>3</sup>
