## **Pro-Sapien to roll out HSEQ Innovate across global logistics provider Peterson**

**Software development specialist Pro-Sapien has secured a contract for the integration of its HSEQ Innovate product with global logistics provider Peterson.**

Established in the offshore logistics sector over 40 years ago, Peterson has expanded from the UK and Netherlands and now has facilities at a number of prominent ports across the world. The significant investment in the new HSE management system will assist Peterson in its mission to deliver industry-leading standards, by improving our existing incident and occurrence processes and utilising business intelligence services for key metrics reporting.

Murdo MacIver, Peterson Board Director commented, *'Trust and safety are core values for Peterson so it is of paramount importance that we work with software providers that can give us solutions that continually help us to improve the quality service our clients have come to know us for.'*

*'HSEQ Innovate also has the flexibility to incorporate additional business processes and reporting as we move forward. Peterson has made a strategic investment in the SharePoint platform and the HSEQ Innovate application maximises the benefits of the Microsoft platform.'*

Keith Dawson, Head of HSEQ for Peterson added, *'We reviewed a number of systems and one of the major factors in our decision making process was the management information and reporting that Pro-Sapien provides. In a nutshell; any information we capture in the electronic forms, we can report on; be it via KPI's, reports and/or graphs using a number of different technologies accessible through our SharePoint portal.'*

Murray Ferguson, Commercial Director of Pro-Sapien said, *'We are delighted to be working with Peterson. By investing in HSEQ Innovate, Peterson will see major productivity, process and management benefits. By implementing a system where all follow up actions and tasks are monitored, the Health and Safety team can schedule and prioritise more effectively.'*

### **About Pro-Sapien**

We are software development experts that offer a number of 'Portals for Compliance' products built on Microsoft SharePoint, various business intelligence tools and cutting-edge mobile technologies. The team have years of experience working with the UKs largest companies across a number of sectors including Engineering, Oil & Gas, Finance and Logistics.

Our flagship product, HSEQ Innovate has been advocated by some of the world's largest companies and deployed in Europe, North America and the Middle East. For more information on Pro-Sapien or to arrange a software demonstration contact:
