

Transport Pouch Catalog

Recipient of the Department
of Defense Award for
Vendor Excellence

PVC Free (Chlorine Free) Medium Duty "Super-Tuff" Transport Pouch

Impervious, abrasion resistant and highly tear resistant co-extruded scrim supported polyethylene material highly resistant to zipper tear-out without use of reinforcement tape.

Material complies with EPA burn restrictions involving the release of chlorine gas, thereby eliminating the disposal problems associated with vinyl materials.

This material also remains flexible down to -70 degrees F. (-57 degrees C.) so that it can be used in outdoor winter environments or morgue coolers without fear of "cracking".

Blue color to enhance post mortem forensic photography study without removing remains from the bag (Also available in black or white upon request).

Adult size bag available with dual No. 8 (HD) zipper pulls to facilitate opening and closing bag. 300 Lb Static Lift Tested

Heat-sealed ends with **UNIQUE NO SIDE SEAM CONSTRUCTION** to comply with OSHA Reg. 3130.

PVC (Chlorine) Free "Super-Tuff" MRI Safe Cadaver Pouch

This pouch contains no metallic components so can be used in Magnetic Resonance Imaging (MRI) machines for post mortem imaging studies without removing cadaver from the pouch.

Impervious, abrasion resistant and highly tear resistant 10 mil poly coated scrim supported polyethylene outer shell

This material also remains flexible down to -70 degrees F. (-57 degrees C.) so that it can be used in outdoor winter environments or morgue coolers without fear of "cracking".

Material complies with EPA burn restrictions involving the release of chlorine gas during cremation, thereby eliminating the disposal problems associated with vinyl materials.

This material also remains flexible down to -70 degrees F. (-57 degrees C.) so that it can be used in outdoor winter environments or morgue coolers without fear of "cracking".

Bottom of pouch and back side of access panel are lined with Gelok™ absorbent pads to absorb any excess body or embalming fluids.

Heavy Duty Bag-In-Bag Chlorine Free Infectious Disease Transport Pouch

National Stock Number NSN: 9930-01-632-0180

Unlike vinyl pouches, all materials remain flexible to -70 deg f (-56 deg c)

6 - 1,000 lb test webbing handles to allow either two or four individuals to transport

If inner liner material is breached, the outer liner will still contain any body fluids and prevent exposure to transporting personnel

HD 12 mil (304 micron) pvc free ultra-strong fluid tight exterior pouch material in silver color to reflect suns rays and keep contents cooler

10 (250 micron) mil thick scrim supported forensic blue inner liner offers a strong and abrasion resistant total material thickness of 22 mil (550 microns)

In addition to providing a double safety liner, our blue inner liner provides excellent background for forensic photography w/o removal from the pouch. (Also available in white/white configuration)

Each Pouch supplied with plastic shroud wrap to minimize contamination of exterior pouch material when loading remains

#8 HD nylon zipper with padlock style zipper pulls. This allows pouch to be sealed with our MP-SEAL product to provide chain of custody protection during transport.

Unique WMD BioVu™ HD Transport Pouch

- Unique optically clear interior vinyl panel allows viewing the remains contained in the bag with minimal exposure risk to personnel. Secured inner panel also allows for examination of remains while maintaining "Chain of Custody" integrity using our serialized tamper resistant zipper pull seals.
- All seams are 100% RF heat sealed to eliminate any possible leakage. Designed for today's "high-risk" bio-hazard exposures (Complies with OSHA Reg. 3130 - Universal Precautions)
- Envelope style heavy-duty zipper with dual zipper pulls
- Exterior material is 18 Mil HD abrasion resistant vinyl scrim supported and reinforced vinyl
- Eight (8) padded handles RF welded directly into and are integral to the bag material for comfortable handling during transport. This eliminates the exterior sewn or riveted "webbing" style handles used on traditional transport body bags. This feature avoids webbing "tear-out" or failure during rough handling, while maintaining the fluid tight integrity of the bag.
- Static Lift Tested to 750 LB Capacity. Easily lifted by helicopter or crane using standard webbing style sling.
- Available with optional bio sorb pad and/or attached clear document pouch (Standard on the BioVu™ Models)
- Available in standard 36" W x 94" L or X-Large 54" W x 108" L
