

NRF introduces new products at Automechanika Frankfurt 2018 >

From 8 - 12 September NRF participated at Automechanika Frankfurt 2018, the world's leading trade fair for the automotive service industry. With a large two-storey stand and a crew of 30 international sales people, NRF was ready for a busy week. During the exhibition NRF focused on the introduction of new product groups and the range expansion of existing product groups.

NRF at Automechanika Frankfurt >

As a leading aftermarket supplier NRF is of course present at the Automechanika in Frankfurt. This year NRF moved to a more central location in Hall 3.0. The crew of 30 international sales people met more than 500 valuable customers and future partners in just 5 days time.

New product groups >

NRF expanded their air conditioning product range with 3 new product groups. During the Automechanika was the official launch of these product groups:

▪ Compressor clutches

The compressor is the heart of the A/C system. When it breaks down, the compressor usually needs to be replaced. In some situations when a failure occurs, it is also possible to change only the compressor clutch.

NRF introduces a new range of 59 compressor clutches. With this range NRF offers compressor clutches for the most common A/C compressors on the market.

▪ Compressor oil

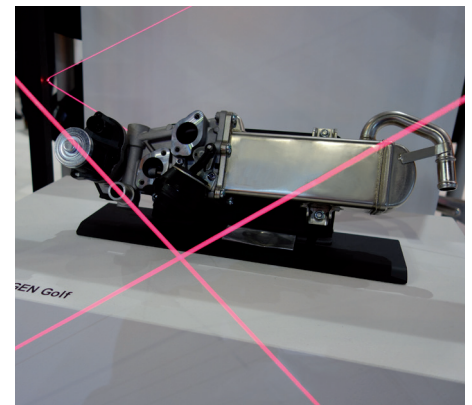

As a leading supplier of compressors, NRF now added compressor PAG oil to their range. The range of NRF exists of the PAG oils in different viscosities including for the new R1234YF refrigerant. And POE oils for hybrid/ electrical applications.

▪ Blower motor resistors

Blower resistors are resistors which are used to control the fan speed of automotive blowers. NRF offers a range of 90 blower motor resistors, covering 200+ OE numbers.

EGR cooler range expansion >

2 years ago NRF introduced an EGR cooler range, being the first aftermarket supplier. Currently the range exists out of 67 EGR coolers for passenger cars, light commercial vehicles and trucks. The latest range expansion is the recent introduction of 2 new Scania EGR coolers for the P, G, R and T-series (EURO 4 / EURO 5). Also for these SKUs, NRF is currently the only aftermarket supplier of these parts.

New oil coolers for intarders >

At the exhibition NRF introduced also a couple of new oil coolers for intarders. NRF offers 6 types, suitable for several truck brands.

AFTERMOVIE AUTOMECHANIKA >
