

# ANTIVIRUS MANAGEMENT

With more than 53,000 viruses existing today, managing and updating anti-virus software can be both costly and cumbersome for many businesses. In most cases the anti-virus software-based tools to protect your company's data are already in place. These tools are only as effective as the most recently updated virus files.

AVI Systems can alleviate the headaches associated with managing anti-virus functionality and assures your company will be ready when a virus attacks.

## Proactive Maintenance

- Automated Anti-Virus updates for Servers and workstations
- Monthly and quarterly maintenance

## Administration

- Automated periodic signature file update
- Established virus prevention policies

## Documentation

- Maintenance logs
- Anti -Virus configuration

## Advanced Services

- Virus detection reporting
