# LepideMigrator for Exchange

LepideMigrator for Exchange has been designed to deliver the fastest, most cost effective and simplest means of migrating to and from Microsoft Exchange. It supports Office 365 migration, Intra-forest and Cross-forest migrations of mailboxes and Public Folders in Exchange Server. It provides a host of features to help simplify the entire process and ensure that you have a pain free migration.

Exchange Server

Office 365

### **Key Features**

- Provides pre-migration analysis to gather information about the items you wish to migrate
- Presents you with a detailed summary of relevant migration scenarios
- Utilises the processing power of any networked computer to speed up the migration by sharing the load
- Allows you to split the migration out into stages, create a schedule to automatically run whenever suits you best and specify blackout times to avoid any potential user or resource disruption
- Offers real time alerts either via the console or delivered to any specified email account
- Allows users with the right administrative permissions to see specified details about the migration through a web based console

- □ Supports co-existence on changes to new and existing items such as calendar entries, invitations, schedules, contacts etc.
- Migrates everything, including outlook rules/folder permissions, outlook profiles, the mailbox and Public Folder permissions and the Global Address List with no impact to the end user
- Allows you to migrate from any version of Exchange to any other version of Exchange
- Enables you to roll back tasks within the migration project at the click of a button
- Allows you to migrate public folders without having to 'double hop'
- Supports the migration of all languages and characters from source to destination
